Ward, 2013-04-26 Broadening the conversation begun in *Making Publics in Early Modern Europe* 2009 this book examines how the spatial dynamics of public making changed the shape of early modern society The publics visited in this volume are voluntary groupings of diverse individuals that could coalesce through the performative uptake of shared cultural forms and practices The contributors argue that such forms of association were social productions of space as well as collective identities Chapters explore a range of cultural activities such as theatre performances travel and migration practices of persuasion the embodied experiences of lived space and the central importance of media and material things in the creation of publics and the production of spaces They assess a multiplicity of publics that produced and occupied a multiplicity of social spaces where collective identity and voice could be created discovered asserted and exercised Cultural producers and consumers thus challenged dominant ideas about just who could enter the public arena greatly expanding both the real and imaginary spaces of public life to include hitherto excluded groups of private people The consequences of this historical reconfiguration of public space remain relevant especially for contemporary efforts to meaningfully include the views of ordinary people in public life

Translation, Poetics, and the Stage Romy Heylen, 2014-08-13 This book establishes an analytical model for the description of existing translations in their historical context within a framework suggested by systemic concepts of literature It argues against mainstream 20th century translation theory and by proposing a socio cultural model of translation takes into account how a translation functions in the receiving culture The case studies of successive translations of *Hamlet* in France from the eighteenth century neoclassical version of Jean Francois Ducis to the 20th century Lacanian post structuralist stage production of Daniel Mesguich show the translator at work Each chapter focuses on a different aspect of the changing theatrical and literary norms to which translators through the ages have been bound by the expectations both of their audiences and the literary establishment *Stereotypes and stereotyping in early modern England* Koji

Yamamoto, 2022-10-25 Early modern stereotypes used to be studied as evidence of popular belief something mired with prejudices and commonly held assumptions *Stereotypes and stereotyping in early modern England* goes beyond this view by exploring practices of stereotyping as contested processes To do so the volume draws on recent works on social psychology and sociology It thereby brings together early modern case studies and explores how stereotypes and their mobilisation shaped various negotiations of power in spheres of life such as politics religion economy and knowledge production
