 Clinical Application** Gerhard Litscher, 2018-10-09 This book is a printed edition of the Special Issue Acupuncture Basic  
 Research and Clinical Application that was published in Medicines Application and Evaluation of Acupuncture in the  
 Treatment of Neurological Diseases Liming Lu, Nenggui Xu, Myeong Soo Lee, Chunzhi Tang, Yong Tang, Bing Zhu, 2023-06-21  
 Neurological disorders such as Alzheimer's disease and Parkinson's disease are an important cause of disability and death  
 worldwide and pose a serious burden on the global health system over the past 30 years Acupuncture as the most widely  
 used traditional Chinese medicine therapy in the world has been widely used in 183 countries and regions Acupuncture can  
 treat more than 300 kinds of diseases especially for neurological diseases Due to the unique advantages of acupuncture such  
 as good therapeutic effect and low side effects many researchers have conducted extensive clinical studies on the  
 effectiveness and safety of acupuncture in the treatment of neurological diseases laying a foundation for the practicability  
 and scientific vigor of this complementary and alternative therapeutic approach There are still many problems unanswered in  
 the current clinical research on acupuncture for the treatment of neurological diseases First of all clinical research is lagging  
 behind due to the lack of emphasis on modern advanced methods and analytical techniques e.g. artificial intelligence omics  
 analysis bioinformatics analysis data mining and multidisciplinary integration process Secondly the quality of reports on most  
 clinical studies of acupuncture treatment for neurological diseases is extremely low Most clinical studies have not adopted  
 standardized methodological evaluations authoritative disease diagnosis standards and efficacy evaluation standards The  
 lack of compliance regulations and strict study design reduces the accuracy and authenticity of the research Thirdly there is  
 a lack of integrated assessment of the distribution of evidence for acupuncture treatment of neurological diseases Therefore  
 strictly designed clinical research and in depth and systematic analysis method are currently needed to provide high quality  
 evidence for acupuncture treatment of neurological diseases In this Research Topic we hope to further understand the role of  
 acupuncture in the treatment of neurological diseases through clinical research and secondary research The range of  
 acupuncture includes manual acupuncture electro acupuncture body needling auricular acupuncture scalp acupuncture laser  
 acupuncture and acupressure etc Neurological diseases include stroke meningitis encephalitis tetanus Alzheimer's disease  
 and other dementias Parkinson's disease epilepsy multiple sclerosis motor neurone disease migraine tense type headaches  
 headaches from drug overuse and others *Current Catalog* National Library of Medicine (U.S.), 1993 First multi year

*Pain and Pain-Related Neuropsychiatric Disorders: From Mechanistic Insights to Innovative Therapeutic Strategies* Álvaro Llorente-Berzal, Francesca Guida,Fabio Turco,Rosmara Infantino,2025-04-07

Chronic pain is an important personal and socio economic burden affecting more than 30% of people worldwide It is highly disabling and associated with long term affective and cognitive sequelae Despite synergistic advances in basic and clinical research some of the most severe conditions remain poorly managed shifting from nociceptive nature to neuropathic and nociplastic components and major neuropsychiatric complications Therefore the understanding of pathophysiological mechanisms and the discovery of new pharmacological targets and innovative approaches are strongly awaited Important advances in basic research focus on the mechanistic aspect offering no direct implication for novel therapeutic strategies Conversely the use of innovative therapies is not easily considered in clinical practice breaking the process of translation for therapy The primary goal of this Research Topic is to create a synergistic circularity of knowledge merging clinical challenges with the latest pathophysiological findings in the field of pain and related neuropsychiatric disorders with implications for pharmacological innovation In addition with a view to sustainability particular attention will be given to compounds of natural origin from new cannabinoids alkaloids and capsaicinoids to tannins flavonoids and other substances or approaches

**The Praeger Handbook of Acupuncture for Pain Management** Jun Xu MD, L.Ac,2014-10-14 This unique text examines 30 specific pain management case studies to explain pain treatments from the perspectives of Eastern acupuncture and traditional Chinese medicine as well as that of Western medical practice Millions of Americans are affected or incapacitated by a wide variety of chronic pain from heel spurs herniated discs and hip bursitis to osteoarthritis plantar fasciitis and rotator cuff tears As complex as the injuries and problems can be medically speaking for many pain sufferers the question is simple can acupuncture work to make my pain go away This book provides information from 30 different pain management cases to shed light on the effectiveness of acupuncture treatments in specific situations Presented in easy to understand plain language the author explains why acupuncture works to stop pain from the theoretical frameworks of both traditional Chinese medicine and Western medicine Each chapter describes the potential sources and systems of specific pain depicts the acupuncture points for that pain and explains how they work The case studies selected from more than 9 000 patients seen by Dr Xu during his 14 years of clinical practice in the United States document how acupuncture has effectively granted these individuals relief from pain whether viewed from the Western science of neurology or the Eastern theories of yin and yang and keeping the body s energies in a balanced state
