The Handbook of Adult Clinical Psychology Alan Carr,Muireann McNulty,2016-03-31 The second edition of the Handbook of Adult Clinical

Psychology An Evidence Based Practice Approach like its predecessor provides clinical psychologists in training with a comprehensive practice handbook to help build the skills necessary to complete a clinical placement in the field of adult mental health. While practical in orientation, the book is based solidly on empirical evidence. Building on the success of the previous edition, this handbook has been extensively revised in a number of ways. Throughout the book, the text, references, and website addresses have been updated to reflect important developments since the publication of the first edition. Recent research findings on the epidemiology, aetiology, course, outcome, assessment, and treatment of all psychological problems considered in this volume have been incorporated into the text. Account has been taken of changes in the diagnosis and classification of psychological problems reflected in the DSM 5. Chapters on ADHD in adults, emotion focused therapy, radically open dialectical behaviour therapy, and schema therapy have been added. The book is divided into 6 sections. Section 1 covers conceptual frameworks for practice, lifespan development, classification, and epidemiology. CBT, psychodynamic, emotion focused, systemic, and bio medical models, and general assessment procedures. Section 2 deals with mood problems: depression, bipolar disorder, suicide risk, and anger management. Section 3 focuses on anxiety problems: social phobia, generalized anxiety disorder, panic disorder, obsessive compulsive disorder, post traumatic stress disorder, and depersonalization disorder. Section 4 deals with psychological problems linked to physical health: health anxiety, somatization, chronic pain, adjustment to cancer, and eating disorders. Section 5 focuses on other significant psychological problems that come to the attention of clinical psychologists in adult mental health services: ADHD in adults, alcohol and other drug problems, psychosis, and psychological problems in older adults. Section 6 contains chapters on therapeutic approaches to psychological distress related to complex childhood trauma: dialectical behaviour therapy for borderline personality disorder, racially open dialectical behaviour therapy for over controlled presentations, and schema therapy. Each of the chapters on clinical problems explains how to assess and treat the condition in an evidence based way, with reference to case material. Interventions from cognitive behavioural, psychodynamic, interpersonal, systemic, and biomedical approaches are described where there is evidence that they are effective for the problem in question. Skill building exercises and further reading for psychologists and patients are included at the end of each chapter. This book is one of a set of three volumes which cover the lion's share of the curriculum for clinical psychologists in training in the UK and Ireland. The other two volumes are the Handbook of Child and Adolescent Clinical Psychology, Third Edition, by Alan Carr, and the Handbook of Intellectual Disability and Clinical Psychology Practice, Second Edition, edited by Alan Carr, Christine Linehan, Gary O'Reilly, Patricia Noonan Walsh, and John McEvoy. Oxford Guide to Surviving as a CBT Therapist, Martina Mueller, Helen Kennerley, Freda McManus, David Westbrook, 2010-05-20. For the newly trained Cognitive Behavioural Therapist, there are a wealth of challenges and difficulties faced as they try and apply their new found skills in the outside world. *Anger Treatment for People with Developmental Disabilities* John L. Taylor, Raymond W. Novaco, 2005-12-17 Anger and aggression are prevalent problems among people with developmental disabilities and constitute primary reasons for them to be admitted and re admitted to institutions They are also a key reason for the prescribing of behaviour control and anti psychotic medication to this client group Stimulated by growing research in this area mental health and criminal justice professionals have begun to see the benefits of anger assessment and cognitive behavioural anger treatment for people with developmental disabilities There is no prior text to guide anger treatment provision to this client group This text presents a manual guided cognitive behavioural anger treatment protocol grounded in

a solid theoretical framework and empirical evidence for its efficacy in clinical practice The assessment and treatment approach is designed to engage and motivate patients with recurrent and deep rooted anger problems and their manifestation in serious aggressive behaviour Accompanying the treatment protocol are a number of worksheets handouts and exercise sheets for clinicians and clients that can be accessed online *Case Studies in Clinical Psychological Science* William O'Donohue, Scott O. Lilienfeld, 2013-01-29 In the past few decades clinical science has emerged as a prominent model for training and practice in clinical psychology This model emphasizes evidence derived from high quality research and is consistent with the increasingly influential evidence based movement in medicine which is a vital step toward making psychotherapy more effective efficient and safe Despite this trend much current psychological practice is not evidence based moreover there is a marked dearth of resources available to train students and assist practitioners with the challenging goal of translating science into practice *Case Studies in Clinical Psychological Science* demonstrates in detail how the clinical science model can be applied to actual cases Edited by Professors William O Donohue and Scott O Lilienfeld this book s unique structure presents dialogues between leading clinical researchers regarding the treatment of a wide variety of psychological problems from depression and Alzheimer s disease to Panic Disorder and chronic pain Chapters describe what evidence based practice consists of for various clinical problems and are followed by commentary sections in which other leading clinical researchers analyze the case at hand pointing out additional assessment and treatment options and controversial issues The chapter authors then reply to the commentary in response sections By examining the application of scientifically based interventions to actual cases and modeling thoughtful and collegial discussion among prominent clinical researchers *Case Studies in Clinical Psychological Science* will assist students practitioners and clinical researchers with the crucial task of applying research evidence to psychotherapy and bridging the gap between science and practice
