Darwin, Frederick Burkhardt, 1985 The letters in this volume cover two of the most momentous years in Darwin's life Begun in 1856 and the fruit of twenty years of study and reflection Darwin's manuscript on the species question was a little more than half finished and at least two years from publication when in June 1858 Darwin unexpectedly received a letter and a manuscript from Alfred Russel Wallace indicating that he too had independently formulated a theory of natural selection The letters detail the various stages in the preparation of what was to become one of the world's most famous works Darwin's *On the Origin of Species by Means of Natural Selection* published by John Murray in November 1859 They reveal the first impressions of Darwin's book given by his most trusted confidants and they relate Darwin's anxious response to the early reception of his theory by friends family members and prominent naturalists This volume provides the capstone to Darwin's remarkable efforts for more than two decades to solve one of nature's greatest riddles the origin of species **Crows and Jays** Steve Madge, 2010-06-30 *Crows and Jays* is a combination of scientifically accurate information and an identification guide planned to give anyone whether a birdwatcher or biologist a greater understanding of the lives of these beautiful yet very complex group of birds 120 species of crows jays and their allies exist in the world today Many are exceedingly beautiful in colour grace and form whereas others are black and somewhat sinister in appearance In no other group of perching birds has evolution produced such a degree of variation from the tiny Hume's Ground Jay of the steppe highlands of Tibet to the huge Thick billed Raven of the mountains of Ethiopia Some have had a long association with people and appear in tales of mythology and superstition while others have been regarded as agricultural pests The great majority however remain largely unknown their only contact with humanity being the destruction of their specialised habitats As a consequence more than 20

species are now regarded as internationally endangered some of which are very poorly known The 30 superb colour plates by Hilary Burn in this book depict them all each plate is accompanied by an informative caption page summarising the criteria required to identify the species alongside colour world distribution maps Some of these birds bearing such evocative names as the Banggai Crow Mesopotamian Crow and Flores Crow have never been illustrated before The authoritative text by Steve Madge treats each species in depth summarising identification techniques and concisely reviewing all aspects of corvid behaviour distribution population and taxonomy The author has had first hand experience of most of the species during his travels throughout the world travels in which he gradually became fascinated by this very special but somewhat ignored group of birds This will surely be a standard work of reference for many years to come
