Rothwell, Behnam Bakhshandeh, 2022-07-05 Coaching is a necessary skill for managers It is important as a fundamental part of an organization s talent efforts including talent acquisition development and retention strategies For a coaching program to succeed in an organization it should be

recognized as a useful approach throughout the organization and become part of the fabric of the corporate culture Performance Coaching for Managers provides an important tool for organizations to use to train their managers on coaching This book differs significantly from other books in the coaching market Many books on coaching cast coaches as facilitators who question their clients the coachees helping them to articulate their own problems formulate their own solutions develop their own action plans to solve problems and measure the success of efforts to implement those plans That is called a nondirective approach But this book adopts a directive approach by casting the coach as a manager who diagnoses the problems with worker job performance and offers specific advice on how to solve those problems While there is nothing wrong with a nondirective approach it does not always work well in job performance reviews in which the manager must inform the worker about gaps between what is needed the desired and what is performed the actual The significant difference between what is currently available in the market and what is offered in this book is the authors collective experience of over 70 combined years of hands on research and delivery experiences in the Human Resources Development field According to the Harvard Business Review 2015 workers generally expect their immediate supervisors to give them honest feedback on how well they do their jobs and specific advice on what to do if they are not performing in alignment with organizational expectations When workers do not receive advice but instead are questioned about their own views they regard their managers as either incompetent or disingenuous Effective managers should be able to offer direction to their employees After all managers are responsible for ensuring that their organizational units deliver the results needed by the organization If they fail to do that the organization does not achieve its strategic goals This book gives managers direction in how to offer directive coaching to their workers Alternative Solutions to Higher Education's Challenges Laura M. Harrison, Peter C. Mather, 2015-08-27 Moving beyond critique Alternative Solutions to Higher Education's Challenges uses an appreciative approach to highlight what is working in colleges and universities and offers an examination of how institutions can improve practice Drawing on examples and cases from real higher education institutions this book offers a solution focused framework that challenges the negative assumptions that have plagued higher education Chapters explore how current narratives have perpetuated and maintained systematic flaws in our education system and have hindered reform This invaluable resource breaks from the substantial literature that only highlights the many problems facing higher education today and instead provides alternative strategies and essential recommendations for moving higher education institutions forward Creating The World We Want To Live In Bridget Grenville-Cleave, Dóra Guðmundsdóttir, Felicia Huppert, Vanessa King, David Roffey, Sue Roffey, Marten de Vries, 2021-03-28 This book is about hope and a call to action to make the world the kind of place we want to live in Our hope is to provoke conversation and gently challenge possibly long held views beliefs and ideologies about the way the world works and the people in that world Written by eminent researchers and experienced practitioners the book explores the principles that underpin living well and gives examples of how this can be achieved not

just in our own lives but across communities and the planet we share Chapters cover the stages of life from childhood to ageing the foundations of everyday flourishing including health and relationships and finally wellbeing in the wider world addressing issues such as economics politics and the environment Based in the scientific evidence of what works and supported by illustrations of good practice this book is both ambitious and aspirational The book is designed for a wide audience anyone seeking to create positive change in the world their institutions or communities www creatingtheworldwewanttolivein org Handbook of Tourism and Quality-of-Life Research II Muzaffer Uysal, M.
