**Technological Dimensions of Defence Against Terrorism** U.F. Aydoğdu, 2013-10-25 The technological developments

of recent years have influenced both the threat of terrorist attacks and the defence against them and continue to be the focus of attention. Terrorist groups are not slow to exploit new technological developments and adapt them to their own ends and the forces of counterterrorism cannot afford to fall behind in their understanding of potential threats. This book presents the proceedings of the NATO Centre of Excellence Defence against Terrorism COE DAT Advanced Research Workshop Technological Dimensions of Defence against Terrorism held in Ankara Turkey in November 2011. Seventeen expert speakers from four countries military and civilian practitioners business leaders researchers and academics delivered a series of papers in sessions on understanding the challenges the role of technology in terrorist attacks and the role of technology against terrorist attacks. The topics covered include a brief history of terrorism and technology technological advances and the impact on terrorism and counterterrorism efforts the role of the commercial world in the defence against terrorism transportation technology and its effects on the nature of terrorist attacks terrorist threats to critical energy infrastructure technology and protection systems. The book is a significant contribution to the field of counterterrorism and will be of interest to all those whose work involves the relationship between technology and terrorism.
