This annotated guide to sources of information on the social science aspects of energy and energy alternatives describes materials and sources of interest to users at all levels. The chapters separate information according to the type of material or the issuing organization. The index classifies according to type of energy or energy issue. The final chapter is a special section of listings of empirical social science studies on energy and the energy crisis which contain detailed annotation on the methods, variables, and findings. Those research projects cover attitudes, behavior, costs, policy, and other energy-related matters.

Select Committee on Small Business, 1975 *Energy Abstracts for Policy Analysis*, 1976-07 **Energy Research and Development and Small Business: how much? How much more from small business? Subcommittee on Housing and Community Development, 1977 Routledge Revivals: Energy (1975) Denton Morrison, 2018-05-08 Originally published in 1975. Energy provides a comprehensive bibliography of energy in the context of the social sciences. The book argues that energy problems are best seen in the context of social phenomena such as social attitudes, social behaviours, social institutions, and structures and populations. The authors argue that to examine energy problems outside of the context of social factors is to lack a full and detailed examination of the subject. The bibliography provides a comprehensive collection of sources from a range of areas in the social sciences on the subject of energy. **Wind Energy Revolution** Christopher C. Gillis, 2023-12-14 It may sound simple: fashion a set of blades, attach them to a generator, set the machine on top of a tower, and let the wind do the work of creating electricity. Not so. Most of these attempts fail, even with the availability of the latest technologies. In *Wind Energy Revolution*, Christopher C. Gillis Sr. examines the efforts to develop small wind generators for use at homes, farms, and ranches following the 1973 Arab Oil Embargo. Wind machines were once featured prominently on farms and homesteads throughout the Midwest of the United States and Canada during the late 1910s through the early 1950s in areas that had no access to overhead electric power.

transmission lines As a result of rural America's connection to the power grid many of these pioneer wind electric machines fell victim to electrical power lines Interest in wind energy resurfaced in the early 1970s when energy shortages were created by the Arab Oil Embargo the rise of environmentalism and the move toward self sufficient off the grid living Early wind electric machines were dusted off and restored back into service while several former manufacturers reemerged and entrepreneurs developed new designs Political and societal interest in renewable energies wind and solar began to wane in the early 1980s and did not return until the late 1990s Even so the developments in the 1970s influenced how Americans subsequently viewed and used renewable power Wind Energy Revolution is a first of its kind comprehensive history for historians and anyone interested in wind as a viable renewable resource **John Barling's Solar Fun Book** John Barling,1979 Hearings, Reports and Prints of the Senate Select Committee on Small Business United States.
