Good House Building A Life On The Land:

A Good House Richard Manning,1993 A memoir of one man s successful attempt to integrate environmental and spiritual values into his home follows Richard Manning a recently remarried reporter in search of new beginnings as he builds a new home in Montana

This Organic Life Joan Dye Gussow,2002-10-01 Joan Dye Gussow is an extraordinarily ordinary woman She lives in a home not unlike the average home in a neighborhood that is more or less typically suburban What sets her apart from the rest of us is that she thinks more deeply and in more eloquent detail about food In sharing her ponderings she sets a delightful example for those of us who seek the healthiest most pleasurable lifestyle within an environment determined to propel us in the opposite direction Joan is a suburbanite with a green thumb with a feisty defiant spirit and a relentlessly positive outlook At the heart of This Organic Life is the premise that locally grown food eaten in season makes sense economically ecologically and gastronomically Transporting produce to New York from California not to mention Central and South America Australia or Europe consumes more energy in transit than it yields in calories It costs 435 fossil fuel calories to fly a 5 calorie strawberry from California to New York Add in the deleterious effects of agribusiness such as the endless cycle of pesticide herbicide and chemical fertilizers the loss of topsoil from erosion of over tilled croplands depleted aquifers and soil salinization from over irrigation and the arguments in favor of this organic life become overwhelmingly convincing Joan s story is funny and fiery as she points out the absurdities we have unthinkingly come to accept You won t find an electric can opener in this woman s house In fact you probably won t find many cans as Joan has discovered ways to nourish herself literally and spiritually from her own backyard If you are looking for a tale of courage and independence in a setting that is entirely familiar read her story

The Bulldozer in the Countryside Adam Rome,2001-04-23 The concern today about suburban sprawl is not new In the decades after World War II the spread of tract house construction changed the nature of millions of acres of land and a variety of Americans began to protest against the environmental costs of suburban development By the mid 1960s indeed many of the critics were attempting to institutionalize an urban land ethic The Bulldozer in the Countryside was the first scholarly work to analyze the successes and failures of the varied efforts to address the environmental consequences of suburban growth from 1945 to 1970 For scholars and students of American history the book offers a compelling insight into two of the great stories of modern times the mass migration to the suburbs and the rise of the environmental movement The book also offers a valuable historical perspective for participants in contemporary debates about the alternatives to sprawl
