Good Natured The Origins Of Right And Wrong In Humans And Other Animals:

Good Natured Frans B. M. DE WAAL, F. B. M. de Waal, 2009-06-30 To observe a dog's guilty look to witness a gorilla's self sacrifice for a wounded mate to watch an elephant herd's communal effort on behalf of a stranded calf to catch animals in certain acts is to wonder what moves them Might there be a code of ethics in the animal kingdom Must an animal be human to be humane In this provocative book a renowned scientist takes on those who have declared ethics uniquely human Making a compelling case for a morality grounded in biology he shows how ethical behavior is as much a matter of evolution as any other trait in humans and animals alike World famous for his brilliant descriptions of Machiavellian power plays among chimpanzees the nastier side of animal life Frans de Waal here contends that animals have a nice side as well Making his case through vivid anecdotes drawn from his work with apes and monkeys and bolstered by the intriguing voluminous data from his and others ongoing research de Waal shows us that many of the building blocks of morality are natural they can be observed in other animals Through his eyes we see how not just primates but all kinds of animals from marine mammals to dogs respond to social rules help each other share food resolve conflict to mutual satisfaction even develop a crude sense of justice and fairness Natural selection may be harsh but it has produced highly successful species that survive through cooperation and mutual assistance De Waal identifies this paradox as the key to an evolutionary account of morality and demonstrates that human morality could never have developed without the foundation of fellow feeling our species shares with other animals As his work makes clear a morality grounded in biology leads to an entirely different conception of what it means to be human and humane

Good Natured Frans B.M. Waal, 1997 *Humans and Other Animals in*

Eighteenth-century British Culture Frank Palmeri, 2006 This collection examines changing perceptions of and relations between humans and nonhuman animals in Britain As the contributors pose questions related to modes of representing animals and animal human hybrids Gulliver's Travels and works by Mary and Percy Shelley emerge as key texts The volume will interest scholars students and general readers concerned with the representation of animals and ethical issues raised by the human uses of other animals

Natural and Divine Law Jean Porter, 1999 Though the concept of natural law took center stage during the Middle Ages the theological aspects of this august intellectual tradition have been largely forgotten by the modern church In this book ethicist Jean Porter shows the continuing significance of the natural law tradition for Christian ethics Based on a careful analysis of natural law as it emerged in the medieval period Porter's work explores several important scholastic theologians and canonists whose writings are not only worthy of study in their own right but also make important contributions to moral reflection today

The MIT Encyclopedia of the Cognitive Sciences (MITECS) Robert A. Wilson, Frank C. Keil, 2001-09-04 Since the 1970s the cognitive sciences have offered multidisciplinary ways of understanding the mind and cognition The MIT Encyclopedia of the Cognitive Sciences MITECS is a landmark comprehensive reference work that represents the methodological and theoretical diversity of this changing field At the core

of the encyclopedia are 471 concise entries from Acquisition and Adaptationism to Wundt and X bar Theory Each article written by a leading researcher in the field provides an accessible introduction to an important concept in the cognitive sciences as well as references or further readings Six extended essays which collectively serve as a roadmap to the articles provide overviews of each of six major areas of cognitive science Philosophy Psychology Neurosciences Computational Intelligence Linguistics and Language and Culture Cognition and Evolution For both students and researchers MITECS will be an indispensable guide to the current state of the cognitive sciences *The Wisdom of the Liminal* Celia

Deane-Drummond,2014-10-30 In this book Celia Deane Drummond charts a new direction for theological anthropology in light of what is now known about the evolutionary trajectories of humans and other animals She presents a case for human beings becoming fully themselves through their encounter with God after the pattern of Christ but also through their relationships with each other and with other animals Drawing on classical sources particularly the work of Thomas Aquinas Deane Drummond explores various facets of humans and other animals in terms of reason freedom language and community In probing and questioning how human distinctiveness has been defined using philosophical tools she engages with a range of scientific disciplines including evolutionary biology biological anthropology animal behavior ethology and cognitive psychology The result is a novel deeply nuanced interpretation of what it means to be distinctively human in the image of God **The Oxford Handbook of International Human Rights Law** Dinah Shelton,2013-10-24 The Oxford Handbook of

International Human Rights Law provides a comprehensive and original overview of one of the fundamental topics within international law It contains substantial new essays by more than forty leading experts in the field giving students scholars and practitioners a complete overview of the issues that inform research as well as a map of the debates that animate the field Each chapter features a critical and up to date analysis of the current state of debate and discussion assessing recent work and advancing the understanding of all aspects of this developing area of international law The Handbook consists of 39 chapters divided into seven parts Parts I and II explore the foundational theories and the historical antecedents of human rights law from a diverse set of disciplines including the philosophical religious biological and psychological origins of moral development and altruism and sociological findings about cooperation and conflict Part III focuses on the law making process and categories of rights Parts IV and V examine the normative and institutional evolution of human rights and discuss this impact on various doctrines of general international law The final two parts are more speculative examining whether there is an advantage to considering major social problems from a human rights perspective and if so how that might be done Part VI analyses current problems that are being addressed by governments both domestically and through international organizations and issues that have been placed on the human rights agenda of the United Nations such as state responsibility for human rights violations and economic sanctions to enforce human rights Part VII then evaluates the impact of international human rights law over the past six decades from a variety of perspectives The Handbook is an invaluable

resource for scholars students and practitioners of international human rights law It provides the reader with new perspectives on international human rights law that are both multidisciplinary and geographically and culturally diverse

The Better Angels of Our Nature Steven Pinker,2012-09-25 Faced with the ceaseless stream of news about war crime and terrorism one could easily think this is the most violent age ever seen Yet as bestselling author Pinker shows in this startling and engaging new work just the opposite is true Evolutionary Origins of Morality Leonard D. Katz,2000 This volume includes four principal papers and a total of 43 peer commentaries on the evolutionary origins of morality

Policing Gender and Alicia Giménez Bartlett's Crime Fiction Nina L. Molinaro,2016-03-03 Alicia Gim nez Bartlett s popular crime series written in Spanish and organized around the exploits of Police Inspector Petra Delicado and Deputy Inspector Fermin Garzon is arguably the most successful detective series published in Spain during the previous three decades Nina L Molinaro examines the tensions between the rhetoric of gender differences espoused by the woman detective and the orthodox ideology of the police procedural She argues that even as the series incorporates gender differences into the crime series formula it does so in order to correct women naturalize men s authority sanction social hierarchies and assuage collective anxieties As Molinaro shows with the exception of the protagonist the women characters require constant surveillance and modification often as a result of men s supposedly intrinsic protectiveness or excessive sexuality Men by contrast circulate more freely in the fictional world and are intrinsic to the political psychological and economic prosperity of their communities Molinaro situates her discussion in Petra Delicado s contemporary Spain of dog owners Hola Russian cults and gated communities **The Routledge Companion to Religion and Science** James W. Haag,Gregory R.

Peterson,Michael L. Spezio,2012-03-12 The field of religion and science is one of the most exciting and dynamic areas of research today This Companion brings together an outstanding team of scholars to explore the ways in which science intersects with the major religions of the world and religious naturalism The collection provides an overview of the field and also indicates ways in which it is developing Its multicultural breadth and scientific rigor on topics that are and will be compelling issues in the first part of the twenty first century and beyond will be welcomed by students and scholars alike

Myth of Universal Human Rights David N. Stamos,2015-11-17 In this groundbreaking and provocative new book philosopher of science David N Stamos challenges the current conceptions of human rights and argues that the existence of universal human rights is a modern myth Using an evolutionary analysis to support his claims Stamos traces the origin of the myth from the English Levellers of 1640s London to our modern day Theoretical defenses of the belief in human rights are critically examined including defenses of nonconsensus concepts In the final chapter Stamos develops a method of naturalized normative ethics which he then applies to topics routinely dealt with in terms of human rights In all of this Stamos hopes to show that there is a better way of dealing with matters of ethics and justice a way that involves applying the whole of our evolved moral being rather than only parts of it and that is fiction free **On Animals** David L.

Clough,2012-02-02 This volume is a project in systematic theology a rigorous engagement with the Christian tradition in relation to animals under the doctrinal headings of creation reconciliation and redemption and in dialogue with the Bible and theological voices central to the tradition The book shows that such engagement with the tradition with the question of the animal in mind produces surprising answers that challenge modern anthropocentric assumptions For the most part therefore the novelty of the project lies in the questions raised rather than the proposal of innovative answers to it The transformation in our thinking about animals for which the book argues results in the main from looking squarely for the first time at the sum of what we are already committed to believing about other animals and their place in God s creation **Encyclopedia of Anthropology** H. James Birx,2006 Focuses on physical social and applied anthropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories Animal Rights John M. Kistler,2000-06-30 Introductions to each chapter explain the issues as well as the arguments that surround them and a general introduction to the volume thoroughly explains how to use the book Each entry contains the following information author title edition series title location of publisher name of publisher number of pages year of publication and International Standard Book Number Annotations include the most important information available to help the researcher including web sites that contain not only the full text of the book when available but also excerpts and articles or interviews by the author short quotations from the books and short descriptions and summaries of the books All the information provided allows students to locate exactly what they need while encouraging them to explore other issues and differing viewpoints The Moral Mind Henry Haslam,2016-11-16 The reality and validity of the moral sense which ordinary people take for granted took a battering in the last century Materialist trends in philosophy decline in religious faith and a loosening of traditional moral constraints contributed to a shift in public attitudes with many decent honest folk both aware of a questioning of moral claims and uneasy with a world that has no place for the moral dimension Haslam shows how important the moral sense is to the human personality and exposes the weakness in much current thinking that suggests otherwise His goal is to help the reader to a mature and confident understanding of the moral mind which constitutes an essential part of what it is to be human **Animals as Persons** Gary L. Francione,2008-06-17 A prominent and respected philosopher of animal rights law and ethical theory Gary L Francione is known for his criticism of animal welfare laws and regulations his abolitionist theory of animal rights and his promotion of veganism and nonviolence as the baseline principles of the abolitionist movement In this collection Francione advances the most radical theory of animal rights to date Unlike Peter Singer Francione maintains that we cannot morally justify using animals under any circumstances and unlike Tom Regan Francione s theory applies to all sentient beings not only to those who have more sophisticated cognitive abilities **Zoographies** Matthew Calarco,2008-07-08 Zoographies challenges the anthropocentrism of the Continental philosophical tradition and advances the position that while some distinctions are valid

humans and animals are best viewed as part of an ontological whole Matthew Calarco draws on ethological and evolutionary evidence and the work of Heidegger who called for a radicalized responsibility toward all forms of life He also turns to Levinas who raised questions about the nature and scope of ethics Agamben who held the anthropological machine responsible for the horrors of the twentieth century and Derrida who initiated a nonanthropocentric ethics Calarco concludes with a call for the abolition of classical versions of the human animal distinction and asks that we devise new ways of thinking about and living with animals

The Priority of Love Timothy Patrick Jackson, 2003 This book explores the relation between agape or Christian charity and social justice Timothy Jackson defines agape as the central virtue in Christian ethical thought and action and applies his insights to three concrete issues political violence forgiveness and abortion Taking his primary cue from the New Testament while drawing extensively from contemporary theology and philosophy Jackson identifies three features of Christian charity unconditional commitment to the good of others equal regard for others well being and passionate service

open to self sacrifice for the sake of others Charity prescribed by Jesus for his disciples and named by Saint Paul as the greatest theological virtue is contrasted with various accounts of justice Jackson argues that agape is not trumped by justice or other goods Rather agape precedes justice without the work of love society would not produce persons capable of merit demerit and contract the elements of most modern conceptions of justice Jackson then considers the implications of his ideas for several questions the nature of God the relation between Christian love and political violence the place of forgiveness and the morality of abortion Arguing that agapic love is to be construed as a gift of grace as well as a divine commandment Jackson concludes that love is the eternal life that makes temporal existence possible and thus the first Christian virtue Though foremost a contribution to Christian ethics Jackson s arguments and the issues he takes up will find a broader readership
