Good Neighborhoods A Study Of In Town And Suburban Residential Environments:

Good Neighborhoods Sidney Brower, 2000-02-28 What makes a good neighborhood Can one neighborhood be good for all people Brower's study examines the variable image of the ideal residential area in contemporary and earlier writings from utopian visions and popular media to historical records and the findings of social science research Brower identifies four common ideal neighborhood types each providing a distinct and specific residential experience that suits a particular way of life He details the characteristics of each of these good neighborhoods and argues that their coexistence in a single urban environment is not only possible but desirable it creates a healthy variety of residential areas that together suit the needs and desires of different urban dwellers This absorbing and timely study will be of interest to scholars and professionals in urban studies urban design and planning environmental studies environment psychology and sociology

Residential Satisfaction and Housing Policy Evolution Clinton Aigbavboa, Wellington Thwala, 2018-07-04 This book explores residential satisfaction and housing policy trends in developing nations by using subsidised low income housing examples in South Africa Ghana and Nigeria as case studies While there has been much documentation on the formation of residential satisfaction and the evolution of housing policy in developed nations relatively little has been written about these topics in developing nations This book provides readers with two major practical insights The first is focused on the theoretical underpinning of residential satisfaction and the formation of residential satisfaction in subsidised low income housing through the development of a conceptual framework while the second is focused on housing policy evolution and its trends in South Africa In this section of the book comparative overviews of public housing in two West African countries are provided with an emphasis on the philosophical basis for its development in these countries The central aim of the book is to provide readers with ideas on residential satisfaction formation and housing policy trends in South Africa

Fleeing the City M. Thompson, 2009-08-31 This collection of essays explores the phenomenon of antiurbanism the antipathy fear and hatred of the city Antiurbanism has been a pervasive counter discourse to modernity and urbanization especially since the beginning of industrialism and the dawning of modern life Most of the attention on modernity has been focused on urbanization and its consequences But as the essays collected here demonstrate antiurbanism is an equally important reality as it can be seen as playing a crucial role in cultural identity in the formation of the self within the context of modernity as well as in the root of many forms of conservative politics and cultural movements

Creating Healthy Neighborhoods Ann Forsyth, Emily Salomon, Laura Smead, 2017-10-24 Good housing Easy transit Food access Green spaces Gathering places Everybody wants to live in a healthy neighborhood Bridging the gap between research and practice it maps out ways for cities and towns to help their residents thrive in places designed for living well approaching health from every side physical mental and social

Community Livability Fritz Wagner, Roger W. Caves, 2012-06-25 What is a livable community How do you design and develop one What does government at all levels need to do to support and nurture the cause of livable communities Using a

blend of theory and practice experts in the field look at evidence from international state and local perspectives to explore what is meant by the term livable communities Chapters examine the various influencing factors such as the effect and importance of transportation options alternatives to the elderly the significance of walkability as a factor in developing a livable and healthy community the importance of good open space providing for human activity and health restorative benefits the importance of coordinated land use and transportation planning and the relationship between livability and quality of life While much of the discussion of this topic is usually theoretical and abstract Wagner and Caves use case studies from North America Brazil and the United Kingdom to provide substantive examples of initiatives implemented across the world This book fills an important gap in the literature on livable communities and at the same time assists policy officials professionals and academics in their quest to develop livable communities
