**God is Green** Bob Shore-Goss, 2016-10-28 At this time of climate crisis here is a practical Christian ecospirituality It emerges from the pastoral and theological experience of Reverend Robert Shore Goss who worked with his congregation by making the earth a member of the church by greening worship and by helping the church building and operations attain a carbon neutral footprint Shore Goss explores an ecospirituality grounded in incarnational compassion Practicing incarnational compassion means following the lived praxis of Jesus and the commission of the risen Christ as Gardener Jesus becomes the green face of God Restrictive Christian spiritualities that exclude the earth as an original blessing of God must expand This expansion leads to the realization that the incarnation of Christ has deep roots in the earth and the fleshly or biological tissue of life This book aims to foster ecological conversation in churches and outlines the following practices for congregations meditating on nature inviting sermons on green topics covenanting with the earth and retrieving the natural elements of the sacraments These practices help us recover ourselves as fleshly members of the earth and the network of life If we fall in love with God s creation says Shore Goss we will fight against climate change

**Nature and Creation** Richard H. Hiers, 2023-04-18 People have lived on Earth since before recorded history depending on nature to provide for and clean up after them But Nature cannot do it all anymore Too many people too much trash and too much toxic waste People have long lived in interdependence with other living things Yet humans now degrade and destroy the global environment that nurtures all species including human beings Human activities contaminate earth air and sea causing thousands of species to go extinct Rising global heat produces vicious cycles of catastrophic drought fires horrific storms floods famines and massive migrations by desperate climate refugees We don t hear much anymore about man s conquest of nature Nature God s creation now clearly has the last word Contrast the theocentric faith and ethics embedded in the Old and New Testaments Here the good world that God created and continues to create was made to be shared with all other living things All alike are made from the earth and destined to return to it Humans were meant to till the soil appreciate enjoy and care for life around them and trust their Creator for what is yet to be

Sitting in the Earth and Laughing and How to Tell God From the Devil to complete A Roy Eckardt s trilogy on comedy the devil and God Soren Kierkegaard attests that it is only by the deepest suffering that one acquires true authority in the use of the comic Composed within this frame of reference the foundation of this volume is its analysis of the terror of death for human beings In this context Eckardt maintains that the all decisive truth is that humankind never asked to be but has been thrown into existence Accordingly it is immoral or even diabolical to blame human beings for the terrible evils of life including the specter of death Human beings are proximately responsible for evil but never ultimately responsible

*Creatures of the Same God* Andrew Linzey, 2009 I don t know why you re spending all your time on this They re only animals for heaven s sake That was the reaction of one of Andrew Linzey s fellow students at King s College London when he was studying theology in the 1970s Since then the now Rev Dr Andrew Linzey has been arguing that animals aren t only anything but rather that they matter to God and should do so to us In this collection of essays Linzey counters with his customary wit erudition and insight some contemporary and perhaps surprising challenges to animal rights from ecotheologians the Church and politicians He contends that far from the sometimes shallow judgments of those who think animals unworthy of theological consideration the Christian tradition has a wellspring of sources and resources available to taking animals seriously Instead of being marginal to the Christian experience Linzey concludes animals can take their rightful place alongside human beings as creatures of the same God There is a long forgotten spiritual tradition that two children both named Jesus were born in Bethlehem to two sets of parents named Joseph and Mary This tradition is supported by the different accounts of the nativity and life of Jesus Christ in the gospels of Matthew and Luke Although the Church chose to ignore this tradition something of it survived in early Christian

art and symbolism The full tradition was preserved only in the literature of esoteric sects such as Gnosticism which remained outside the official teachings of institutionalized Christianity

**Foucault and Theology** Jonathan Tran, 2011-06-16 Near the end of his life Michel Foucault turned his attention to the early church Fathers He did so not for anything like a return to God but rather because he found in those sources alternatives for re imaging the self And though Foucault never seriously entertained Christianity beyond theorizing its aesthetic style one might argue that Christian practices like confession or Eucharist share family resemblances to Foucaultian sensibilities This book will explain how to do theology in light of Foucault or more precisely to read Foucault as if God mattered Therefore it will seek to articulate practices like confession prayer and so on as techniques for the self situate the church as politics within present constellations of power disclose theological knowledges as modes of critical intervention or what Foucault called archaeology and conceptualize Christian existence in time through mnemonic practices of genealogy

**Eating and Believing** David Grumett, Rachel Muers, 2011-11-03 What are the links between people's beliefs and the foods they choose to eat In the modern Western world dietary choices are a topic of ethical and political debate but how can centuries of Christian thought and practice also inform them And how do reasons for abstaining from particular foods in the modern world compare with earlier ones This book will shed new light on modern vegetarianism and related forms of dietary choice by situating them in the context of historic Christian practice It will show how the theological significance of embodied practice may be retrieved and reconceived in the present day Food and diet is a neglected area of Christian theology and Christianity is conspicuous among the modern world's religions in having few dietary rules or customs Yet historically food and the practices surrounding it have significantly shaped Christian lives and identities This collection prepared collaboratively includes contributions on the relationship between Christian beliefs and food practices in specific historical contexts It considers the relationship between eating and believing from non Christian perspectives that have in turn shaped Christian attitudes and practices It also examines ethical arguments about vegetarianism and their significance for emerging Christian theologies of food

consumption of animal based foods Spirituality Practice With eloquence and humility Melanie Joy appeals to the values that all of us already have and have always had She reminds us of who we are Jonathan Safran Foer New York Times bestselling author Melanie Joy examines the psychological props that make it possible for us to adore some animals and eat others and kicks them all aside Peter Singer professor of bioethics at Princeton University and author of Animal Liberation Now

Satan and the Problem of Evil Gregory A. Boyd, 2025-08-04 Where does evil come from If there is a sovereign creator God as Christian faith holds is this God ultimately responsible for evil Does God s sovereignty mean that God causes each instance of sin and suffering How do Satan his demons and hell fit into God s providential oversight of all creation and history How does God interact with human intention and action If people act freely does God know in particular every human decision before the choice is made In this important book Gregory A Boyd mounts a thorough response to these ages old questions which remain both crucial and contentious both practical and complex In this work Boyd defends his scripturally grounded trinitarian warfare theodicy presented in God at War with rigorous philosophical reflection and insights from human experience and scientific discovery Critiquing the classical Calvinist solution to the problem of evil he advocates an alternative understanding of the sovereignty of the trinitarian God and of the reality of Satan that sheds light on our fallen human condition While all may not agree with Boyd s conclusions Satan and the Problem of Evil promises to advance the church s discussion of these critical issues

*Great Apes and Humans* Benjamin B. Beck, Tara S. Stoinski, Michael Hutchins, Terry L. Maple, Bryan Norton, 2014-05-27 The great apes gorillas chimpanzees bonobos and orangutans are known to be our closest living relatives Chimpanzees in particular share 98 percent of our DNA and scientists widely agree that they exhibit intellectual abilities long thought to be unique to humans such as self awareness and the ability to interpret the moods and identify the needs of others The close relation of apes to humans raises important ethical questions Are they better protected in the wild or in zoos Should they be used in biomedical research Should they be afforded the same legal protections as humans Great Apes and Humans is the first book to present a spectrum of viewpoints on human responsibilities toward great apes A variety of field biologists academic scientists zoo professionals psychologists sociologists ethicists and legal scholars consider apes in both the wild and captivity They present sobering statistics on the declining numbers of wild apes specifically discussing the decimation of great ape populations due to wild game consumption They explore the role of apes in the educational missions of zoos as well as the need for sanctuaries for wild ape orphans and former research subjects After examining the social division between apes and humans from historical evolutionary and cognitive perspectives they conclude by reviewing the current moral and legal status of great apes as well as how apes cognitive skills inform these issues Although this provocative book contains many different opinions the uniting concern of the contributors is the safety and well being of great apes Only by continuing the dialogue so clearly presented here can we hope to ensure their future

*Encountering Earth* Trevor George Hunsberger Bechtel, Matt Eaton, Tim Harvie, 2018-05-14

One day Matthew Eaton was walking through an impromptu animal shelter display at his local pet store when suddenly an eight month old kitten dug his claws into Eaton's flesh. Eaton recognized that the eyes of this cat and the curve of his claw compelled a response analogous to those found in the writings of Buber, Levinas and Derrida. And not just Eaton but a whole community of theologians have found themselves in an encounter with particular places and animals that demands rich theological reflection. Eaton enlisted fellow editors Harvie and Bechtel to collect the essays in this volume in which theologians listen to horses, rats, snakes, cats, dogs and the earth itself who become new theological voices demanding a response. In this volume the voice of the more than human world is heard as making theology possible. These essays suggest that what we say theologically represents not simply ideas of our own making subsequently superimposed onto the natural world through our own discovery but rather flow from an expressive Earth. **Bound to Be Free** Reinhard

Hutter, 2004-07-20 **Bound to Be Free** explores the scriptural concepts of church, *ekklesia*, freedom, *eleutheria*, and truthful speech, *parrhesia*, showing not only that the proper meanings of three concepts interpenetrate one another but also that rending them asunder lies at the root of Christian division today. According to Reinhard Hutter, the crucial interrelationship of these three concepts has long been obscured by ongoing church division. Separated from each other, many Christians assume that freedom can be maintained and truthful speech preserved only at the cost of unity. Others assume that Christian unity can be attained only if freedom and truthful speech are narrowly circumscribed in their proper exercise. Christian division issues from the all too familiar individualistic accounts of church, freedom, and speech that have haunted modernity and clouded the proclamation of the gospel. This book shows that here at the beginning of the twenty-first century it is imperative that Christians attend to this crucial interrelationship and its source in the God of the gospel. Hutter discusses the meaning, role, and importance of each concept in turn, engaging along the way a wide range of classical and contemporary voices in theology, philosophy, and culture that reveal in different ways how church, freedom, and truthful speech support one another. **Bound to Be Free** is a groundbreaking work that challenges common approaches to ecumenism and points a fruitful new course ahead. [Vegetarianism: A Guide for the Perplexed](#) Kerry Walters, 2012-06-07

The choice of whether or not to consume animals is more than merely a dietary one. It frequently reflects deep ethical commitments or religious convictions that serve as the bedrock of an entire lifestyle. Proponents of vegetarianism frequently infuriate nonvegetarians who feel that they're being morally condemned because of what they choose to eat. Vegetarians are frequently infuriated by what they consider to be the nonvegetarians' disregard for the environment and animal suffering. **Vegetarianism: A Guide for the Perplexed** offers a much needed survey of the different arguments offered by ethical vegetarians and their critics. In a rigorous but accessible manner, the author scrutinizes the strengths and weaknesses of arguments in defense of vegetarianism based on compassion, rights, interests, eco-feminism, environmentalism, anthropocentrism, and religion. Authors examined include Peter Singer, Tom Regan, Carol J. Adams, and Kathryn Paxton George. As the global climate crisis worsens

population increases and fossil fuels disappear ethical and public policy questions about the ethics of diet will become ever more urgent This book is a useful resource for thinking through the questions
