Good Web Site Guide 2004:

History in Practice 2nd edition Ludmilla Jordanova, 2016-07-28 History in Practice explores the discipline's breadth, its complexities and the tasks it takes on. This study by one of the liveliest and most acute practitioners in the field demystifies what historians do. It looks at history as an academic discipline but also engages with the use of historical ideas in the wider world. Historical work has public consequences and draws considerable energy from contemporary preoccupations. For this new edition of her respected and widely used book Ludmilla Jordanova has revised the text and added a new chapter that takes into account recent world events. She discusses the role of the internet, globalisation, world history and the current enthusiasm for military history. This book is essential reading for all students needing an understanding of history as a discipline. Web Research Marie L. Radford, Susan B. Barnes, Linda Robinson Barr, 2006 Web Research: Selecting, Evaluating and Citing provides helpful tips on how to find, select and cite information accessed on the World Wide Web with topics that include the Web as a research tool, types of Web sites and information credibility, content evaluation, copyright issues and when and how to cite Web sources. Search Engines, Content Evaluation, Visual Evaluation, Copyright Issues on the Web, Citing a Website, Research Communication.

Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for 2006, Part 1B, 109-1 Hearings,*, 2005 **Federal Register**, 2006-05-12

Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for 2006 United States. Congress. House. Committee on Appropriations. Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies, 2005 **Metadata Best Practices and Guidelines** Jung-ran Park, 2014-07-10 Metadata best practices and guidelines function as an essential mechanism for metadata planning, application and management and interoperability. There has been a rapidly growing body of digital repositories and collections; accordingly, a wide range of digital projects and initiatives have adopted various metadata standards. Because of differences in the formats and knowledge domains of the resources, it is inevitable that these digital projects and initiatives may have different needs regarding metadata. Therefore, when a metadata standard is adopted in various institutions and organizations, it may have to be modified to reflect the community needs and characteristics of given resources. The flexibility and complex structure of natural language allow for the representation of a concept in various ways. Thus, common understanding and definitions of terms in a given metadata standard is essential for quality metadata generation, management, interoperability and resource sharing. This opens up a pressing need for a systematic examination of documentation practices, an area that up to now has been relatively unexplored. This book begins to fill the research gap through an empirical assessment of metadata guidelines and best practices. This is a book published as a special issue of the Journal of Library Metadata. **American Dietetic Association Guide to Diabetes Medical Nutrition Therapy and Education** Tami Ross, Jackie Boucher, Belinda S.

O'Connell, 2005 Medical nutrition therapy plays an integral role in the management of diabetes. This comprehensive guide is
