Good Governance In Europe's Integrated Market:

Good Governance in Europe's Integrated Market Christian Joerges, Renaud Dehousse, 2002 Exploring the constitutional and the administrative law dimensions of the developing European market governance this volume considers the changes which have occurred from the perspective of both legal and social theory

Good Governance in Europe's Integrated Market Christian Joerges, Renaud Dehousse, 2002

European Integration Perspectives in Times of Global Crises

Andreas Kellerhals, Tobias Baumgartner, Corinne Reber, 2023-04-06 With its White Paper on the Future of Europe the European Commission initiated a debate on fundamental reforms of the Union's structures in 2017 The paper outlined five reform scenarios ranging from a reduction and refocusing of the EU's competences to deeper integration in the spirit of a United States of Europe However the White Paper ultimately had no tangible impact as none of the proposed scenarios were implemented Nevertheless current global challenges including health crises climate change energy resource management shifting global power dynamics and related security issues underscore the growing need for a strong and united Europe The idea of an ever closer union as enshrined in the preamble of the 1992 EU Treaty could be experiencing a revival Against this backdrop the 13th Network Europe Conference examined the significance of the European integration project in times of global crisis Discussions focused on key policy challenges the EU's relationships with its eastern and southern neighbors and its role in relation to global actors such as China and Russia The publication features contributions from Michael Ambühl, Jelena Ceranic Perisic, Viorel Cibotaru, Christelle Genoud, Christos V Gortsos, Iris Goldner Lang, Nora Meier, Peter Christian Müller, Graff Eva, Pils Clara, Portela and Peter R Rodrigues Network Europe was founded in 2003 by the Europa Institute at the University of Zurich with support from the Swiss government It serves as a forum for scholarly exchange on legal and political aspects of European integration bringing together researchers from across Europe

New Modes of Governance in Europe

A. Héritier, M. Rhodes, 2010-12-15 Based on the research of the EU 6th framework funded research consortium on New Modes of Governance in the European Union this volume explores the roots, execution and applications of new forms of governance and evaluates their success

Centralised Enforcement, Legitimacy and Good Governance in the EU Melanie Smith, 2009-09-10 Article 226 EC is the central mechanism of enforcement in the EC Treaty and has remained unchanged since the original Treaty of Rome It provides the European Commission as guardian of the Treaty with a broad power of policing Member States conduct Article 226 has been traditionally characterised as an arena of secretive negotiation focused on the sole function of effective enforcement This study seeks to move beyond this approach by characterising Article 226 as a multi functional mechanism within the Treaty It does this by examining the central mechanism of enforcement through the normative lenses of legitimacy, good administration and good governance

Centralised Enforcement, Legitimacy and Good Governance in the EU is interdisciplinary in nature examining law in its political context It focuses on how the institutions interact and react to competing policy pressures and explores the tensions that lie at the heart of legitimacy in the actions of

public actors by engaging with concepts such as democracy legitimacy and good administration Scholars and policy makers whose work explores Article 226 will find this work especially relevant It will also appeal to those who are interested in enforcement and regulation in the international EU arena as well as those whose work considers concepts such as good governance legitimacy and accountability in the EU It is also relevant to scholars engaged in the study of institutions and processes of interaction and change

The Enforcement of EU Law Stine Andersen, 2012-11-29 A comprehensive analysis of the European Commission's general role in supervising member state compliance with EU law this book provides a detailed assessment of centralized EU enforcement It starts out by asking whether it is viable to establish stronger Commission powers of enforcement at this point in time Against this backdrop and as a means of exploring the role of the Commission the chapters examine a number of different aspects pertaining to enforcement of EU law Beginning with an appraisal of the Commission's function under the general EU infringement procedure stipulated in Articles 258 and 260 TFEU the volume argues that the EU lacks independent self sustained regime authority Moreover this is reflected in both substantive EU law and procedural law including the general EU infringement procedure Chapter two makes the case that Article 258 TFEU can usefully be explained in terms of managerialism Chapter three analyses Article 260 TFEU concerning repetitive infringements In particular it asserts EU member state sanctions sustain the managerial approach It then goes on to examine the Commission's unsuccessful attempts to gain sharper enforcement powers through secondary legislation and identifies the effective points of functional overlap between enforcement powers and certain types of implementing tools Finally it discusses the Commission's role under various non binding ad hoc arrangements The concluding chapter places the general EU infringement procedure in the broader context of a comprehensive negotiated policy process It argues that the enforcement stage shares many features with earlier steps in the legislative process including flexibility and deliberation

Towards A New Executive Order In Europe? Deirdre Curtin, Morten Egeberg, 2013-09-13 The executive branch of government in Europe is being gradually transformed in several significant respects First executive power has been continuously strengthened at the EU level in the form of the European Commission EU level agencies and diplomatic and military staff in the Union Council secretariat Second EU executive bodies relate directly to regulatory authorities at the national level in charge of applying and partly preparing EU laws and programmes partly circumventing ministerial departments Thus parts of national administrations become parts of an integrated and multi level Union administration as well as parts of national executives Such a system with multiple political masters raises delicate questions about political steering and accountability This book focuses on this fascinating development both from a political science and a legal perspective encompassing the consolidation of the supranational executive as well as its relationships with its partners at the national level This book was published as a special issue of West European Politics

European Prudential Banking Regulation and Supervision Larisa Dragomir, 2010-04-05 The book takes stock of new developments in legislation case law

and institutions affecting prudential supervision It also offers an analysis of the difficulties facing banking regulation during the current financial crises including the issue of competition law in the banking sector

Theoretical Approaches to European Integration Sabine Saurugger,2013-08-30 This major new text provides a uniquely broad ranging introduction to and assessment of the contribution of the whole range of theoretical approaches that have been applied to the analysis of European integration It provides tools for understanding the underlying logic behind the political and economic debates that take place in the EU today

The Economy as a Polity: The Political Constitution of Contemporary Capitalism Christian Joerges,2020-09-10 The debate about so called economic globalization has reached a new phase The hegemony of neo liberal thinking has ended in the face of both the increased and increasingly effective resistance to the social consequences of neo liberal market making rising inequality and insecurity throughout the world and the visibly dysfunctional effects of lack of regulation currency and stock market crashes among others Thus the story about the rise and fall of market society which was first told in these terms by Karl Polanyi sixty years ago is about to receive a new chapter In this light this volume offers a novel perspective on the interaction between states and markets In contrast to much of current theoretical wisdom we hold with Polanyi that markets cannot even be consistently thought of as self regulating Markets are always constituted by framework conditions that cannot be set by the markets themselves The range and scope of market rules requires some agreement or at least acceptance for economic exchange to be working at all in democratic societies these rules are at least theoretically always subject to political debate and decision To put the issue in theoretical terms even the most pure version of economic liberalism always entails at the same time a political philosophy This volume thus proposes to understand contemporary capitalism by regarding the economy as a polity as an arrangement that is always constituted by some collective agreements about its mode of operation Such theoretical position on its own though is insufficient to explain the workings of capitalism once and for all Historical experiences with capitalism have led to transformations that require new angles of analysis It is in the nature of the struggles over the embedding of markets that their outcomes are subject to historical contingency and cannot be completely known beforehand Beyond a review of the theoretical tools at hand therefore the analysis of the contemporary constellation of capitalism also requires an understanding of its recent transformations This is the second task to which this volume is devoted through analyses of the current state of regulation of labour and money and through investigations of the historical development and novel forms of the mode of embedding markets While focusing on the renewal of the analysis of contemporary capitalism the volume also points to fruitful directions of institutional or policy change and provides perspectives for a much needed political renewal with a particular focus on the European Union as a novel polity embedding the European economy

EU Law Pau Craig,2024

Functional and Territorial Interest Representation in the EU Michèle Knodt,Christine Quittkat,Justin Greenwood,2014-07-16 Despite a substantial legacy of literature on EU interest representation there is no systematic analysis available on whether a European

model of interest representation in EU governance is detectable across functional and territorial categories of actors Functional actors include associations for business interests the professions and trade unions as well as NGOs and social movements territorial based entities include public actors such as regional and local government as well as actors primarily organised at territorial level What are the similarities and differences between territorial and functional based entities and are the similarities greater than the differences Are the differences sufficient to justify the use of different analytical tools Are the differences within these categories more significant than those across them Is there a professionalised European lobbying class across all actor types Does national embeddedness make a difference Which factors explain the success of actors to participate in European governance This book was originally published as special issue of Journal of European Integration

The European Union Simona Piattoni, 2015 This volume seeks to answer the question Which institutional architecture for which kind of democracy for the EU and discusses a series of institutional architectures in light of the democratic quality of the processes and decisions generated by them

Is Europe Listening to Us? Raphaël Kies, 2016-05-06 How can the European Union engage and connect with the people it aims to represent What initiatives and schemes have been used to engage EU citizens To what extent can such procedures be considered a move forward towards a more participative and democratic Europe This collection of internationally recognised specialists in European integration and innovative democratic practices seek to answer these key questions explore European citizens thoughts and opinions about the EU and evaluate the governing elite s attempts to engage with the public It offers critical analysis of EU justifications and strategies for implementing Deliberative Citizens Involvement Projects and focuses on some of the major participative experiences trialled and implemented by EU institutions By comparing these different attempts to increase and bolster the participation of EU citizens and evaluating their impact the book offers valuable and original material on the civic involvement of EU citizens and the legitimacy of the EU decision making process

'Integration through Law' Revisited Daniel Augenstein, 2016-05-23 Over the last twenty years processes of pluralization differentiation and trans nationalization in the European Union have arguably challenged the centrality of law to European integration Yet these developments also present opportunities to investigate new understandings of law triggered by European integration The contributors to this book revisit one of the first academic projects to conceptualise and study European legal integration the early Integration through Law School On this basis they consider continuities and discontinuities in the underlying social and political landscape which the law is to integrate the object of integration the forms and capacities of the law itself the agent of integration and the way these two dimensions reflect on each other Displaying different normative concerns and varied theoretical starting points all contributors maintain that integration through law remains of enduring significance to the European integration process The volume provides a valuable reference for scholars in the field of European integration studies and European legal and political theory

The EU and Nanotechnologies Tanja Ehnert, 2017-08-10 This book

investigates the role of law in confronting major societal transformations embodied by the emergence of nanotechnologies Taking the case of the European Union it explores who the key decision makers in the regulation of nanotechnologies are and how they take decisions The questions are explored through two distinct case studies the food and chemicals sectors The book charts an incremental retreat of the European Union to its executive powers including soft law measures such as agencies guidelines or implementing measures This the author argues results in the Union s fundamental democratic control mechanisms the EU legislature and the Court of Justice of the EU being circumvented The book recommends several immediate proposals to reform EU risk regulation advocating a greater reliance on the European Parliament and outlining measures to increase the transparency of guidance drafting by EU agencies This important work provides a timely examination of how emerging technologies pose both regulatory and democratic challenges

A Framework for European Competition Law Christopher Townley, 2018-11-29 This book asks whether the current push to increase uniformity in substantive and procedural competition policy and enforcement in Europe as well as in related institutional structures is desirable It focuses on European Union EU competition policy and enforcement related to Articles 101 and 102 TFEU and the merger rules the equivalent rules in the Member States and the relationships between these different legal orders Uniformity has many benefits yet the advantages of diversity are also legion enabling more policy experimentation and innovation and improving the ability to accommodate national preferences Contrary to the overwhelming view of academics practitioners and regulators in this area the book argues that uniformity is insufficient and examines ways of achieving a better mix of uniformity and diversity the EU s motto is United in Diversity To achieve this better mix the book offers a new framework for European competition law Coordinated Diversity Finally this book discusses whether Coordinated Diversity fits with the current legal order in the EU as well as the EU constitutional settlement more generally and suggests some ways that it might be made compatible with this order with relative ease The book s impact could be significant changing the results in individual cases the way cases are argued and what information is relevant More importantly it builds the theoretical foundations for fundamentally altering the way in which the EU and the Member States competition authorities interact allowing space for disagreement and uncertainty The aim is to improve the efficiency and effectiveness of competition policy making and enforcement in Europe It should also increase the legitimacy in this field rebalancing towards the Member States Coordinated Diversity provides a new way of seeing the EU that better blends difference when this is demanded with uniformity and its benefits as necessary A timely and ambitious work this book will be read with interest by all practitioners and academics interested in EU competition law as well as the related fields of political science and economics

European Food Regulation after Enlargement Karolina Žurek, 2011-11-11 This book presents a critical legal perspective on the current direction of EU food regulation Analysing three regulatory mechanisms mutual recognition scientific risk regulation and standardisation in the evolution of food legislation in the EU the book shows the inadequacy of

the current framework in facing the challenges of enlargement Using the particular experience of a new member state Poland the book argues that an enlarged Europe must not disregard diverse socio economic implications of market regulation Due to historical legacies and a bias in favour of homogeneity the EU food regulatory regime has generated a one dimensional crisis oriented approach As a result it tends to overlook other legitimate concerns such as quality diversity and local traditions This book argues that this need not be so *Executive Power of the European Union* Deirdre Curtin,2009 The picture of Brussels based bureaucrats exercising arbitrary executive powers is one of the favourite images conjured by Eurosceptics across the political spectrum This book offers a richer understanding of the nature of the EU s powers how they relate to national governments and how they are controlled **European Union Politics** Michelle Cini,Nieves Pérez-Solórzano Borragán,2022 As the most complete and most issues led textbook on the European Union this bestselling text fully equips you to understand the EU and the many topical issues and debates that surround it Alongside rigorous coverage of he theory institutions and policies of the EU it engages with contemporary debates and current crises The text s accessible writing style makes it the ideal starting point for anyone wishing to fully understand the workings of this complex and ever evolving system Along the way helpful features including key points questions and examples support your learning Book jacket
