Gothic Architecture:

French Gothic Architecture of the Twelfth and Thirteenth Centuries Jean Bony, 1983 Gothic architecture is the most visible and striking product of medieval European civilization Jean Bony whose reputation as a medievalist is worldwide presents its development as an adventure of the imagination allied with radical technical advances the result of a continuing quest for new ways of handling space and light as well as experimenting with the mechanics of stone construction He shows how the new architecture came unexpectedly to be invented in the Paris region around 1140 and follows its history in the great cathedrals of northern France and dozens of other key buildings to the end of the thirteenth century when profound changes occurred in the whole fabric of medieval civilization Rich illustrations including comprehensive maps enhance the text and themselves constitute an exceptionally valuable documentation Despite its evident scholarly intention this book is not meant for specialists alone but is conceived as a progressive infiltration into the complexities of history at work revealing its unpredictable vitality to the uninitiated curious mind *Reading Gothic Architecture* Matthew M. pursuit of the general principles that informed all aspects of Gothic architecture and its culture In this edition Paul Crossley has revised the original text to take into account the proliferation of recent literature books reviews exhibition catalogues and periodicals that have emerged in a variety of languages New illustrations have also been included *Gothic Architecture in France, England, and Italy* Sir Thomas Graham Jackson, 1915 **Gothic Architecture** Edith A. Checa-Artasu, 2025-06-02 Neo Gothic architecture is a global phenomenon observed in Mexico from the 1850s to the mid 20th century even with current examples In Mexico there are more than 500 buildings with some neo Gothic element new parishes and churches large temples examples of exterior decorations beautiful sacred furniture and art inside the temples funerary elements at cemeteries graves mausoleums tombs and civil buildings mansions houses schools hospitals porticoes so on This architecture in Mexico spread in two ways through architecture teaching academies but also thanks to the diffusion of bishops and priests who showed images and engravings for master builders stonemasons and other local artisans to copy Finally they built these buildings many times with the support of the parishioners Also the economic and political elites built mansions and houses in that style to show their wealth and financial and political power Something they also did in their tombs and pantheons since there are many built in that style A book on the characteristics agents and causes of the development of the neo Gothic style in Mexico is pioneering and the first of its kind It is a type of architecture extraordinarily little studied in Mexico A study of these characteristics would be of interest to a sector of the academy interested in the topics of history of architecture art studies on religion and culture in general This book covers a huge gap in knowledge about an architectural style widely spread worldwide and that is widely unknown in Mexico and Latin America and that today is already a cultural heritage to be protected disseminated and valued **Some Account of Gothic Architecture in Spain** Street, 1865 **Some Account of Gothic Architecture in Spain** George Edmund Street, 1865 Gothic Architecture and Sexuality in the Circle of Horace Walpole Matthew M. Reeve, 2020-07-15 Gothic Architecture and Sexuality in the Circle of Horace Walpole shows that the Gothic style in architecture and the decorative arts and the tradition of medievalist research associated with Horace Walpole 1717 1797 and his circle cannot be understood independently of their own homoerotic culture Centered around Walpole s Gothic villa at Strawberry Hill in Twickenham Walpole and his Strawberry Committee of male friends designers and dilettantes invigorated an extraordinary new mode of Gothic design and disseminated it in their own commissions at Old Windsor and Donnington Grove in Berkshire Lee Priory in Kent the Vyne in Hampshire and other sites Matthew M Reeve argues that the new third sex of homoerotically inclined men and the new modern styles that they promoted including the Gothic style and chinoiserie were interrelated movements that shaped English modernity The Gothic style offered the possibility of an alternate aesthetic and gendered order a queer reversal of the dominant Palladian style of the period Many of the houses built by Walpole and his circle were understood by commentators to be manifestations of a new queer aesthetic

and in describing them they offered the earliest critiques of what would be called a queer architecture Exposing the role of sexual coteries in the shaping of eighteenth century English architecture this book offers a profound and eloquent revision to our understanding of the origins of the Gothic Revival and to medievalism itself It will be welcomed by architectural historians as well as scholars of medievalism and specialists in queer studies **Essays on Gothic Architecture** Thomas Warton,James Bentham,Francis Grose,John Milner,1808 **On the Nature of Gothic Architecture** John Ruskin,1854
