Figure 1. Schematic representation of the experimental design. The subjects were divided into three groups: control, low-dose, and high-dose. The control group received a placebo, the low-dose group received a low dose of the drug, and the high-dose group received a high dose of the drug. The subjects were then subjected to a series of tests, including a baseline test, a test after the first dose, a test after the second dose, and a test after the third dose. The results of the tests were then compared between the groups.
