Nash, 2017-08-24. This volume presents new perspectives on the history of higher education for women in the United States. By introducing new voices and viewpoints into the literature on the history of higher education from the early nineteenth century through the 1970s, these essays address the meaning diverse groups of women have made of their education or their exclusion from education and delve deeply into how those experiences were shaped by concepts of race, ethnicity, religion, national origin. Nash demonstrates how an examination of the history of women's education can transform our understanding of educational institutions and processes more generally. **Handbook of Higher Education in Japan** Paul Snowden, 2025-10-01. Just as higher education (HE) in Europe had its beginnings in religious training for the priesthood, HE in feudal Japan too provided instruction for a religious life. But while the evolution to secular instruction was gradual in Europe, in Japan it came with a big bang: the opening of the country and consequent Westernization, and all that that involved in the mid-19th century. This first volume in the new Japan Documents Handbook series tells the story in 25 chapters of how Japan's HE system has become what it is now, ending with a very tentative glimpse into the rest of the 21st century. A variety of themes are covered by scholars; chapters that concentrate on governance look at the distinction between national public and private institutions; others consider important topics such as internationalization, student recruitment, and faculty mobility. More innovative topics include Women of Color Leading in Japanese Higher Education. All provide copious references to other authorities, but rather than just toe the conventional line, they include opinions and proposals that may be contentious or even revolutionary. The editor provides an overview of the subject and its treatment in an Introduction. [Resources in Women's Educational Equity](#), 1980. Literature cited in AGRICOLA, Dissertations abstracts international, ERIC, ABI INFORM, MEDLARS, NTIS, Psychological abstracts, and Sociological abstracts. Selection focuses on education, legal aspects, career aspects, sex differences, lifestyle, and health. In the early 1990s, Ursuline College, a Catholic women's college in Cleveland, completely redesigned its core curriculum to maximize access, retention, and success. The findings presented in this study support the theories upon which the curriculum was designed and add a valuable contribution to the scholarship of educating women.
