#1

Passive-dependent

Patients who are trusting individuals.

They depend on the authoritative figure—in this case, doctors and nurses—to make the main decisions in their healthcare plan.

#2

Open-minded exploring

Patients who seek a personal connection with their doctors.

They are usually open to exploring most options for their medical condition, including alternative medicine and treatments. Also, emotional support is important for this type of patient.

#3

Independent-skeptical

Patients who always question doctors.

They don't accept every recommendation. They tend to seek second or even third opinions and chase after rational statements that are consistent with their knowledge.

#4

Intellectual-researcher

Patients who always perform their literature searches.

They desire scientific explanations for every piece of information. They check their doctors' comments against scientific studies and often prefer doctors who work in prestigious healthcare institutions.

#5

Expedient-flexible

Patients who tend to choose doctors based on availability.

They don't care much about checking every data or prestige. They are usually cost-conscious too, which makes them flexible in their choices for physicians.
