Truth and Knowledge in Curriculum Making Lobat Asadi, Cheryl J. Craig, 2021-01-01 Truth and Knowledge in Curriculum Making addresses issues in curriculum and instruction such as the lack of Black teachers minority representation and mentorship The book arose from a serial interpretation of five published narrative inquiries that pinpointed complexities lived in a teacher knowledge community at T P Yaeger Middle School a campus located in the fourth largest urban center in America The inquiry initially resulted in a documentary style presentation at an educational conference using performance narrative inquiry as an arts based method to recount the research In Truth and Knowledge in Curriculum Making the process of researchers turned actors is unraveled by looking at the lived experiences and identifying the embodied knowledge of teachers in different content areas including Physical Education Music Teaching English as a Second Language Mathematics and Reading The authors use parallel stories counter stories story constellations musical narrative inquiry performance narrative inquiry and other narrative means of sense making as they examine how they may relate to those stories Ethical research dilemmas including the how and why behind each author's choice to burrow into difficult topics such as race gender and conflict resolution are revealed By unpacking the

hidden curriculum examining value creation and by revealing isolated relational experiences of participants and researchers Truth and Knowledge in Curriculum Making instantiates and outlines how truth and knowledge may be formed in educational settings through intertwining narrative inquiry teacher knowledge and aesthetic ways of knowing **Education in Hegel** Nigel Tubbs,2011-10-20 In this wide ranging and compelling set of essays Nigel Tubbs illustrates how a philosophical notion of education lies at the heart of Hegelian philosophy and employs it to critique some of the stereotypes and misreadings from which Hegel often suffers With chapters on philosophical education in relation to life and death self and other subject and substance and to Derrida and Levinas in particular Tubbs brings Hegelian education read as recollection to bear on modern social and political relations He argues in sum that Hegelian philosophy comprehended in terms of education yields a theory of self and other that can inform and reform relations between rich and poor West and East Finally the book addresses the most controversial aspect of any defence of Hegel namely the comprehension of the absolute and its imperialist implications for Western history The author argues passionately that through a notion of philosophical education Hegel teaches us not to avoid the dilemmas that are endemic to modern Western power and mastery when trying to comprehend some of our most pressing human concerns Developing a Christian Apologetics Educational Program Douglas E. Potter,2010-02-18 Many are expressing concern about the future of Christian youth today What can we do to help ensure they will keep their evangelical faith once they graduate from high school Can Christian apologetics provide an educational solution Developing A Christian Apologetics Educational Program explores issues certain to be encountered by secondary school educators who want to teach apologetics as a distinct subject of study either as a part of a Christian institutional or home school curriculum This book helps the apologist and educator blend their skills to soundly integrate the two subjects A solution is sought by providing a background and rationale for implementing an age level appropriate apologetics course at this critical level of Christian education This book is designed as a text to supplement those used in Christian education or applied apologetics courses each chapter successively builds upon the other to help develop an educational philosophy that supports the inclusion of apologetics in the curriculum A model is explained and materials are given to support the development of a curriculum in Christian Apologetics Education at the secondary level Practical ideas are explored and a sample unit of instruction is supplied to help the educator develop an evangelical approach to education that is in the classical apologetic tradition *The Overpowering Truth* Pasquale De Marco,2025-03-23 In a world awash with information it is more critical than ever to distinguish truth from falsehood Misinformation and disinformation are rampant threatening our democracy our society and our way of life This book is a comprehensive guide to the crisis of truth It examines the techniques used to spread false information the psychology of why people believe it and the consequences of living in a world where truth is under attack We will explore the role of social media and the internet in the spread of misinformation and the impact of fake news on our political discourse and social fabric We will also examine the rise of conspiracy theories and the erosion of trust in

institutions But this book is not all doom and gloom We also offer solutions to the crisis of truth We will discuss ways to promote critical thinking and media literacy support independent journalism and hold those who spread false information accountable We will also provide practical tips for readers on how to identify and avoid misinformation and how to engage in civil discourse with those who hold different views This book is a call to action It is time for us to wake up to the dangers of misinformation and take action to protect ourselves and our democracy We must all become truth warriors willing to stand up for what is true even when it is unpopular or inconvenient The truth is under attack and we must defend it If you like this book write a review *Politicians, Power, and the Pursuit of Truth* Pasquale De Marco, 2025-03-22 In *Politicians Power and the Pursuit of Truth* Pasquale De Marco takes a deep dive into the history of presidential deception in the United States examining the motivations behind these deceptions the techniques used to carry them out and the consequences they have had for American democracy From the early days of the republic to the present day presidents have lied to the public about everything from military actions to economic policies to personal scandals Pasquale De Marco argues that this deception is not only a betrayal of the public trust but also a threat to our democracy When presidents lie they undermine the public's faith in government and make it difficult for citizens to make informed decisions about their leaders and their policies This can lead to gridlock and inaction in government as politicians become more focused on protecting themselves and their reputations than on working together to solve the problems facing the country It can also lead to a decline in America's standing in the world as other countries lose faith in the trustworthiness of the United States government Pasquale De Marco also explores the role of the media in presidential deception arguing that the media has a responsibility to hold presidents accountable for their actions and to report on their deceptions in a fair and accurate manner However Pasquale De Marco also acknowledges that the media can sometimes be complicit in presidential deception either by failing to report on it or by giving it more attention than it deserves *Politicians Power and the Pursuit of Truth* is a timely and important book that sheds light on a serious problem facing American democracy Pasquale De Marco provides a comprehensive overview of the history of presidential deception analyzes the consequences of this deception and offers recommendations for how to prevent it from happening in the future This book is a must read for anyone who cares about the future of American democracy If you like this book write a review [The Homiletic Review](#) ,1920 **International Journal of Religious Education** ,1926
