*The People* Gerhard Hirschfeld, No society at any time under any conditions has provided enduring freedom security justice or self determination for all of its citizens The problems that confront the human species today are so large so complex and so urgent that an effective solution requires a framework that considers mankind as a whole The alternative according to Gerhard Hirschfeld is global disaster These observations provide both the motivation and the focus for *The People* a book that proposes a radical departure from traditional perceptions of people in society Hirschfeld argues that the basic relationship between people leaders and the middle class has always been fixed in human society and that the people in all societies and at all times have been subject to domination and exploitation To change this condition to assure that the

people attain dignity and basic human rights he proposes the creation of a much broader social framework The work traces the development of the three sectors of society leaders distinguished by natural talents and the ability to furnish ideas design and organization second the people insecure dependent defenseless and exploited and third the middle class playing the part of an equalizer or moderator to the other two classes The heart of the book is a careful long range analysis of these three great historical forces leading to specific proposals of principles and procedures upon which the creation of a mankind oriented society might be based Whether used as a text or as a manifesto and call to action this exceptional work is a unique contribution that will ensure its appeal to diverse audiences Gerhard Hirschfeld was born in Berlin Germany After World War I he went to South America there combining work in the export business with a study of the cultures of the native peoples He published many articles papers and monographs and is the author of *An Essay on Mankind* Kenneth E Boulding 1910 1993 was president of many scholarly associations including the American Economic Association the Society for General Systems Research and the American Association for the Advancement of Science He authored numerous books including *Towards a New Economics* *Critical Essays on Ecology Distribution and Other Themes* *Three Faces of Power* and *The World as a Total System*
