Shaping the Future , 2007-01-01 World wide the production of teachers has become a sharp political issue during the early years of the twenty first century Current systems for ensuring a supply of capable and knowledgeable teachers have come sustained under attack from politicians economists parents organisations and social critics alike There is less agreement now about teacher education than in any time over the pass fifty years Much of the debate in the public and political arenas has been driven by narrow and expedient consideration and too much of it demonstrates a poor grasp of the deep and complex issues which teacher education in a democracy must confront At the same time there has been a serious educational debate which has focused on what a well trained teacher ought to be able to do and what methods of training and education can produce competent teachers The chapters of this book address these issues in a critical way asking what should the objectives of teacher education be The authors demonstrate the international reach of the debate over teacher education and they ground their

discussions within the national contexts of their own experience All the authors share the view that teacher education involves much more than acquiring a set of skills and techniques Important as these are the well trained teacher needs for example to have an understanding of the contexts of teaching of the reasons why we teach of the role of schools as institutions within political environments as well as a coherent perspective on curriculum and the relevant bodies of theory which give overall point to what is being done What teacher education entails will probably never be beyond contestation at least not so long as it takes place within capitalist democracies These democracies with their tensions running between liberal ideals and economic imperative push and pull teacher education in contradictory directions At present educational ideals seems too quickly and too dogmatically to be traded for immediate fiscal policy The authors of these chapters articulate the reasons why such short term thinking will be detrimental to any approach to teacher education which commits itself to producing well rounded and comprehensively professional teachers

International Handbook of Research and

Development in Technology Education, 2009-01-01 This international handbook reflects on the development of the field of technology education From reviewing how the field has developed and its current strengths consideration is given to where the field might go and how it can be supported in this process This handbook argues that technology is an essential part of

education for all and it provides a unique coverage of the developing field of technology education. It is divided into eight sections from consideration of different approaches to education in different countries through thinking about the nature of technology, perceptions of technology, relationships between science, technology and society, learning and teaching, assessment, teacher education and professional development, and developed and developing research approaches. This book constitutes a significant collection of work from numerous countries and authors actively engaged in technology education research and development. It is intended for graduate students, academics, researchers, curriculum developers, professional development providers, policy makers and practitioners. The development of this handbook represents an important step in the maturity of the field of technology education. The field has matured as our technological society has matured to the point that research and practice can be documented as shared in this publication. Historians will look at this international handbook as a significant comprehensive step for a field of education that focuses on technology, innovation, design and engineering for all students.
