Psychology of Learning for Instruction Marcy Perkins Driscoll, 2000 In this text the applications and implications of learning theories are explained and illustrated using examples ranging from primary school instruction to corporate training A theme of the book is reflective practice designed to foster a critical and reflective mode of thinking when considering any approach to learning and instruction **Educational Psychology** Thomas Fetsco, John McClure, 2005 I applaud the vision the authors had in synthesizing this information in a way that makes the reader more confident in their application of these theories and principles to their own classrooms The authors have wonderfully succeeded in their attempt to integrate this material in a manner quite different from other texts I've read or reviewed Jim Persinger Emporia State University Any textbook that overemphasizes theory neglects the real world any textbook that overemphasizes practice neglects the underlying foundation of theory This book strikes a careful balance between theory and practice by explicitly linking the two Gregory Cutler Bay de Noc Community College By far this is the best educational psychology text I have read because it integrates and applies major learning theories to many of the daily issues future teachers will face Krista Robertson Rhode Island College I see this textbook as well written informative clearly and logically organized and a very useful component for a course in Educational Psychology I like it Raymond E Webster East Carolina University The authors have done an excellent job in producing an easy to follow format and style Paula Holmes Miller Crichton College The authors writing style and presentation level are clear and easy to read along with tables figures concept maps and other visual aids Yuliang Liu Ph D Southern Illinois University The text is well written and some very difficult topics such as Attribution Theory and Constructivism to name just two are easy to understand when compared to similar books I think this is some of the clearest writing I have read in a long time Michael P Verdi California State University San Bernardino I really enjoyed reading this text and I found its comprehensive nature to be a strength Linda W Morse Mississippi State University The authors writing style is clear simple and direct It speaks directly to the reader the examples are concrete and related to education John Isch Martin Luther College Handbook of Research on Schools, Schooling and Human Development Judith L.
