International Handbook of Educational Policy Nina Bascia, Alister Cumming, Amanda Datnow, Kenneth Leithwood, David Livingstone, 2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research in over fifty chapters written by nearly ninety leading researchers from a number of countries It is organized into five broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them The serendipity within chapters with respect to jurisdictional particularities and contrasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large scale reform substantive emphases at several levels on leadership and

governance improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding nally with a contrasting topic workplace learning which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy

International Handbook of Research on Environmental Education Robert B. Stevenson, Michael Brody, Justin Dillon, Arjen E.J. Wals, 2013-05-02 The environment and contested notions of sustainability are increasingly topics of public interest political debate and legislation across the world Environmental education journals now publish research from a wide variety of methodological traditions that show linkages between the environment health development and education The growth in scholarship makes this an opportune time to review and synthesize the knowledge base of the environmental education EE field The purpose of this 51 chapter handbook is not only to illuminate the most important concepts findings and theories that have been developed by EE research but also to critically examine the historical progression of the field its current debates and controversies what is still missing from the EE research agenda and where that agenda might be headed Published for the American Educational Research Association AERA

Effective and Equitable Teacher Practice in

Mathematics and Science Education Nani Teig, Trude Nilsen, Kajsa Yang Hansen, 2024-03-19 This open access book presents original research on effective and equitable teacher practice in mathematics and science education across Nordic countries. It focuses on three key aspects of teacher practice: what teachers teach, how teachers teach, and how teachers assess their students. To provide a comprehensive understanding of teacher practice, data from the IEA's Trends in Mathematics and Science Study (TIMSS) from 2011 to 2019 was analyzed. TIMSS provides large-scale and representative data allowing an in-depth investigation of the relations between teachers, their practices, and student outcomes. The findings highlight the changes in teacher practice over time and the extent to which such changes explain the differences in student outcomes. This research also contributes to understanding how the relationships between teacher practice and student outcomes vary across different student groups, i.e. gender, socioeconomic status, and language background. The empirical evidence presented not only adds a significant layer to the academic discourse but also offers practical implications. These insights are crucial in facilitating educational policymaking and classroom practices aimed at improving student outcomes and closing gaps in educational inequality.

Handbook of Education Policy Research Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10 Co-published by Routledge for the American Educational Research Association (AERA). Educational policy continues to be of major concern. Policy debates about economic growth and national competitiveness, for example, commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA-sponsored Handbook. Organized into seven sections, the Handbook focuses on: 1. disciplinary foundations of educational policy; 2. methodological perspectives; 3. the policy process; 4. resources management and organization; 5. teaching and learning policy; 6. actors and institutions; and 7. education access and differentiation. Drawing from multiple disciplines, the Handbook's over one hundred authors address three central questions: What policy issues and questions have oriented current policy research? What research strategies and methods have proven most fruitful? And what issues, questions, and methods will drive future policy research? Topics such as early childhood education, school choice, access to higher education, teacher accountability, and testing and measurement cut across the 63 chapters in the volume. The politics surrounding these and other issues are objectively analyzed by authors and commentators. Each of the seven sections concludes with two commentaries by leading scholars in the field. The first considers the current state of policy design, and the second addresses the current state of policy research. This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic, government, and think tank researchers engaged in policy research.
