Strikes Around the World, 1968-2005, 2007 Are strikes going out of fashion or are they an inevitable feature of working life This is a longstanding debate The much proclaimed withering away of the strike in the 1950s was quickly overturned by the resurgence of class conflict in the late 1960s and 1970s The period since then has been characterized as one of labor quiescence Commentators again predict the strikes demise at least in the former heartlands of capitalism Patterns of employment are constantly changing and strike activity reflects this The continuing decline of manufacturing in mature industrialized economies is of major importance here though the global relocation of manufacturing may lead to some relocation of strikes Simultaneously we see the growth of disputes in the service sector the tertiarization of strikes This is evident particularly in public services including health care social care and education and is accompanied by a feminization of strikes given the prevalence of women working there This unique study draws on the experience of fifteen countries around the world South Africa Argentina Canada Mexico United States Korea Australia New Zealand Belgium Denmark France Germany the Netherlands Sweden and the United Kingdom Covering the high and low points of strike activity over the period 1968 2005 the study shows continuing evidence of the durability adaptability and necessity of the strike

Trade Unions and Democracy Geoffrey Wood, 2017-09-29 Trade Unions and Democracy explores the role of trade unions as products of and agents for democracy As civil society agents unions may promote democracy within the wider society especially in the case of authoritarian regimes or other rigid political systems by acting as watchdogs and protecting hard won democratic gains Established democratic institutions in many advanced societies are facing new challenges The problem with using trade unions for this purpose is that they remain locked in a cycle of political marginalization and decline Beyond this there are ironically serious questions about whether unions themselves internally function as democracies Certainly there are tensions between rank and file membership and an authoritarian leadership with this infighting having possible effects on strategic deals or alliances and member accountability and actions On the other hand trade unions continue to represent a significant component of society within most industrialized countries and in many cases they have a demonstrated capacity for working with other elements of civil society Looking forward trade unions may be able to play a vital role in channeling and focusing spontaneous popular upsurges In the process they may revitalize themselves through use of greater internal democracy and become geared toward more diverse constituencies The question is will they fulfill this promise or continue to suffer from internal breakups and external breakdowns Can trade unions save themselves and democracy or will both deteriorate in time Trade Unions and Democracy brings together a distinguished panel of leading and emerging scholars in the field and provides a critical assessment of the current role of trade unions in society It explores their capacity to affect political

policies to ensure greater accountability and fairness It also explores the nature of and extent to which internal representative democracy actually operates within trade unions themselves Mark Harcourt is a professor in the Department of Strategic Management and Leadership at Waikato University in New Zealand
