Statistics for People who (think They) Hate Statistics Neil J. Salkind,2010 The bestselling text Statistics for People Who Think They Hate Statistics is the basis for this completely adapted Excel version Author Neil J Salkind presents an often intimidating and difficult subject in a way that is informative personable and clear Researchers and students who find

themselves uncomfortable with the analysis portion of their work will appreciate this book's unhurried pace and thorough friendly presentation. Salkind begins the Excel version with a complete introduction to the software and shows the students how to install the Excel Analysis ToolPak option free to earn access to a host of new and very useful analytical techniques. He then walks students through various statistical procedures beginning with correlations and graphical representation of data and ending with inferential techniques and analysis of variance. Pedagogical features include sidebars offering additional technical information about the topic and set off points that reinforce major themes. Finally questions to chapter exercises, a complete glossary and extensive Excel functionality are located at the back of the book.

Building Arguments Drew Hinderer, 2005-01-28 Building Arguments offers a fresh new approach to informal logic successfully combining an accessible style with a rigorous systematic treatment of argument. It integrates reasoning and writing teaching readers to argue effectively and communicate ideas in persuasive prose. It combines fundamental topics of critical thinking into broader discussions of reasoning. So where other books may treat fallacy identification and avoidance induction and deduction and validity and soundness as ends in themselves Building Arguments presents these topics in a practical yet philosophically sound context. It includes entertaining and relevant examples and exercises drawn from sports popular advertising current events and many academic areas. Building Arguments is unique in its emphasis on helping readers to develop their own persuasive arguments as well as to evaluate arguments from other sources. Using a writing level and organization guided by the principles of reading development the author introduces material gradually moving from a very accessible level to a more rigorous one. The result A book unique in its ability to foster philosophically based argument analysis while promoting reasoning and writing skills across the curriculum.
