Statistical Inference Based on Divergence Measures Leandro Pardo,2018-11-12 The idea of using functionals of Information Theory such as entropies or divergences in statistical inference is not new However in spite of the fact that divergence statistics have become a very good alternative to the classical likelihood ratio test and the Pearson type statistic in discrete models many statisticians remain unaware of this p **Handbook of Exponential and Related Distributions for Engineers and Scientists** Nabendu Pal,Chun Jin,Wooi K. Lim,2005-11-21 The normal distribution is widely known and used by scientists and engineers However there are many cases when the normal distribution is not appropriate due to the data being skewed Rather than leaving you to search through journal articles advanced theoretical monographs or introductory texts for alternative distributions the Handbook of E **Data Analytics in Cognitive Linguistics** Dennis

Tay,Molly Xie Pan,2022-05-09 Contemporary data analytics involves extracting insights from data and translating them into action With its turn towards empirical methods and convergent data sources cognitive linguistics is a fertile context for data analytics There are key differences between data analytics and statistical analysis as typically conceived Though the former requires the latter it emphasizes the role of domain specific knowledge Statistical analysis also tends to be associated with preconceived hypotheses and controlled data Data analytics on the other hand can help explore unstructured datasets and inspire emergent questions This volume addresses two key aspects in data analytics for cognitive linguistic work Firstly it elaborates the bottom up guiding role of data analytics in the research trajectory and how it helps to formulate and refine questions Secondly it shows how data analytics can suggest concrete courses of research based action which is crucial for cognitive linguistics to be truly applied The papers in this volume impart various data analytic methods and report empirical studies across different areas of research and application They aim to benefit new and experienced researchers alike
