ideological background The breadth of specialist knowledge provided by the team of scholars writing for this book enables the manuscript to be viewed as a whole not as a narrow liturgical study Collectively the essays view the manuscript as physical object they discuss the contents they examine the language and they look at the cultural context in which the codex was written

*Tonal Consciousness and the Medieval West* Fiona McAlpine, 2008 Tonal consciousness in the sense of a clear intuition about which note or chord a piece of music will finish on is as much a part of our everyday experience of music as it is of contemporary music theory This book asks to what extent such tonal consciousness might have operated in the minds of musicians of the Middle Ages given the different tone world found in the modes of Gregorian chant in troubadour and trouvère music in Minnesang and in the early polyphony based upon chant The author's approach is analytical focusing on modality and balancing up to date concepts and methods of music analysis with those insights into their own compositional needs and processes that the people of the Middle Ages provided themselves through their writings about music The book examines a range of both music sources and theoretical sources from the ninth to the thirteenth centuries This is a ground breaking contribution both to the study of medieval music and to music analysis

*Reading in Medieval St. Gall* Anna A. Grotans, 2006-05-11 Learning to read in medieval Germany meant learning to read and understand Latin as well as the pupils own language The teaching methods used in the medieval Abbey of St Gall survive in the translations and commentaries of the monk scholar and teacher Notker Labeo c 950-1022 Notker's pedagogic method although deeply rooted in classical and

monastic traditions demonstrates revolutionary innovations that include providing translations in the pupils native German supplying structural commentary in the form of simplified word order and punctuation and furnishing special markers that helped readers to perform texts out loud Anna Grotans examines this unique interplay between orality and literacy in Latin and Old High German and illustrates her study with many examples from Notker s manuscripts This study has much to contribute to our knowledge of medieval reading and of the relationship between Latin and the vernacular in a variety of formal and informal contexts

The St Gall Passion Play Peter Macardle,2007 The early fourteenth century St Gall Passion Play comes from the Central Rhineland Unfortunately its music over one hundred Latin and German chants is given in the manuscript only as brief incipits without any musical notation This interdisciplinary study reconstructs the musical stratum of the play It is the first full scale musical reconstruction of a large German Passion play in recent times using the latest available scholarly data in drama liturgy and music It draws conclusions about performance practice and forces and offers a sound basis for an authentic performance of the play The study applies musical and liturgical data to the problem of localizing the play the first time this has been systematically attempted and assesses how applicable this might be to other plays It presents a detailed study of the distinctive medieval liturgical uses of three German dioceses Mainz Speyer and Worms The comparative approach suggests how the music of other plays might be reconstructed and understood and shows that a better understanding of the music of medieval drama has much to teach us about other aspects of the genre The book should be of interest to literary scholars theatre historians musicologists liturgical scholars and those involved in the performance of early drama

Beach, 2004-04-29 Professor Beach's book on female scribes in twelfth century Bavaria a full length study of the role of women copyists in the Middle Ages is underpinned by the notion that the scriptorium was central to the intellectual revival of the Middle Ages and that women played a role in this renaissance The author examines the exceptional quantity of evidence of female scribal activity in three different religious communities pointing out the various ways in which the women worked alone with other women and even alongside men to produce books for monastic libraries and discussing why their work should have been made visible whereas that of other female scribes remains invisible Beach's focus on manuscript production and the religious intellectual social and economic factors which shaped that production enables her to draw wide ranging conclusions of interest not only to palaeographers but also to those interested in reading literacy religion and gender history
