**Performing Neurology** Jonathan W. Marshall,2016-07-13 This text provides a study of Jean Martin Charcot a founding figure in the history of neurology as a discipline and a colleague of Sigmund Freud It argues that Charcot s diagnostic and pedagogic models explaining both how disease is recognized and described and how to teach the act of neurological diagnosis should be considered through a theatrical lens Considering the constitution of the living moving body in terms of performance Charcot created a situation whereby the line between deceptive acting and real pathology scientific accuracy and creative falsehood and indeed between health and unhealth becomes blurred The physician becomes a medical subject in his or her own display transforming medicine into a potentially destabilizing even grand guignolesque discourse Offering a unique insight into Charcot s work his concepts and his methods this text represents a unique and interdisciplinary analysis cutting across the fields of art and neurology
