Taylor-Pickard,P. Spring,2023-08-28 Globally pork and poultry production has become an extremely competitive industry
There is now more pork consumed in the world than any other meat yet there is still intense competition for the industry to
attract and retain consumers Consumers continue to demand safe high quality pork and poultry products at competitive
prices compared to other high protein food alternatives To ensure sustainability of both the pig and poultry industries
producers must endeavour to seek new technologies to improve production efficiency whilst lowering the cost of production
and producing a quality product This edited collection of articles is taken from a series of seminars that brought together
some of the world s leading authorities in the field of pig and poultry nutrition and production The fundamental theme is to re
examine the current trends in productivity within the pig and poultry industries and to identify nutritional and managerial
means to improve competitiveness as well as the quality of the end product The importance of animal health together with
novel strategies for disease control and ways to minimise the environmental impact of pig and poultry production are covered
Gaining the edge in pork and poultry production is aimed at nutritionists and animal producers as well as students and
