Jazwa, 2024-08-01 This study presents the Early Helladic II ceramic roofing tile fragments from Zygouries a site excavated by Carl Blegen more than a century ago It is the first publication of an entire assemblage of Early Helladic roofing tiles an oft neglected find on archaeological sites Details about the tiles forms features and variability are presented first followed by a production oriented analysis reconstructing much of the chaîne opératoire and complementary volumetric and energetic analyses The results of these studies allow for the local reception and sociopolitical implications of Zygouries s ceramic tiled roof to be explored The assemblage is then contextualized alongside other Early Helladic roofing tile assemblages and the material culture of the period to gain a clearer understanding of the broader cultural significance of such tiled roofs
