C. Relph, 1987-08 Why do the cities of the late twentieth century look as they do What values do their appearance express and enfold Their sheer scale and the durability of their materials assure that our cities will inform future generations about our era in the same way that gothic cathedrals and medieval squares tell us something of the Middle Ages In the meantime our urban landscapes can tell us much about ourselves For E C Relph the urban landscape must be envisioned as a total environment not just streets and

buildings but billboards and parking meters as well The Modern Urban Landscape traces the developments since 1880 in architecture technology planning and society that have formed the visual context of daily life Each of these shaping influences is often viewed in isolation but Relph surveys the ways in which they have operated independently to create what we see when we walk down a street shop in a mall or stare through a windshield on an expressway Two sets of ideas and fashions Relph argues have had an especially important impact on urban landscapes in the twentieth century An internationalism made possible by new building technologies and more rapid communications has replaced regional style and custom as the dominant feature of city appearance while a firm belief in the merits of self consciousness has imposed logical analysis and technical manipulation on such commonplace objects as curbstones and park benches As a result writes Relph the modern urban landscape is both rationalized and artificial which is another way of saying that it is intensely human

*Encyclopedic Dictionary of Semiotics, Media, and Communication* Marcel Danesi,2000-08-01 Semiotics Media Studies and Communication Studies are three closely interlinked fields Briefly stated Semiotics the science of signs looks at how humans search for and construct meaning Communication Studies is concerned with how meaning is conveyed and Media Studies considers the ways in which messages are transmitted and received This dictionary is designed

to help students and general readers unlock the significance of the terminology and jargon commonly used in these fields Being interdisciplinary in nature Semiotics Media and Communication Studies are cluttered with notions derived from other disciplines Hence this dictionary also encompasses basic concepts from the fields of anthropology archaeology psychology psychoanalysis linguistics philosophy artificial intelligence computer science and biology Collected here are the terms concepts personages schools of thought and historical movements that appear frequently in the relevant literature The basis of each entry is a simple definition which often includes the term's origin Illustrations are provided where necessary along with historical sketches of movements or schools of thought The commentary on personages consists of brief statements about their contribution and relevance Thus the dictionary not only defines what a term means but often goes into its history applications and broad implications Terms are cross referenced and their etymology is given where possible This is a compact practical research manual that will relieve much tension for students in semiotics and related fields Because of its interdisciplinary approach it will also provide a range of scholars with a handy reference to disciplines distinct from but related to their own

Cott,1987-01-01 The time has come to define feminism it is no longer possible to ignore it The Century Magazine 1914 In this landmark addition to scholarship Nancy F Cott author of *The Bonds of Womanhood* offers a new interpretation of American feminism during the early decades of this century a period traditionally viewed as one in which women won the right to vote and then lost interest in feminist issues Cott argues instead that this period was a time of crisis and transition from the nineteenth century woman movement to the beginning of modern feminism Many of the issues that are central to women today says Cott were firmly articulated in the early decades of this century For example the problem of defining sexual equality so as to recognize sexual difference between men and women the ambiguous potential of a movement seeking individual freedoms for women by mobilizing sex solidarity and the tensions involved in attaining full expression in work and love are all enduring elements of feminism seized upon by women of the 1910s and 1920s First discussing how feminism was indebted to its predecessors Cott shows that increasing heterogeneity and diverse loyalties among women in the early twentieth century contradicted the premise of the nineteenth century cause of woman the singular noun symbolizing the unity of the female sex From this crisis emerged feminism championing individual variability and refuting the premise that a singular woman existed Cott focuses on the suffrage campaign milieu in which feminism arose giving particular attention to the character and role of the National Woman's Party from its militant suffrage days to its advocacy of the equal rights amendment in the 1920s Against prevailing interpretations of the decline of women's political activities after 1920 Cott counterposes the swelling numbers in women's voluntary associations and their political efforts She also analyzes the pitfalls that awaited women who tried for effectiveness in the male dominated political parties She sets the controversy over the equal rights amendment in new context discussing the full dimensions of the conflict as not merely over personalities tactics or class loyalties but as a signal example of the modern problem of capturing sexual equality and sexual difference in law The book explores the irony strewn path of women who as aspiring professionals and political actors attempted to put into practice the feminist intent to replace the abstraction woman with instead the human sex This history the story of women who first claimed the name feminists builds an essential bridge between the presuffrage period and today      **The Making of Masculinities (Routledge Revivals)** Harry Brod,2018-10-24 This book first published in 1987 is both simple in conception and ambitious in intention It aims at legitimating the new interdisciplinary field of men's studies as one of the most significant and challenging intellectual and curricular developments in academia The fourteen essays included here are drawn from such diverse disciplines as men's studies philosophy psychology sociology history anthropology Black studies biology English literature and gay studies      Building American Cities Joe R.
