Education Policy And Society Theoretical Perspectives:

Education, Policy and Society Ben Cosin, Margaret Hales, 1983 **Education and Disability in Cross-Cultural Perspective** Susan Jeanne Peters, 2013-11-26 A radical departure from previous chronicles of education for people with disabilities this book views special education from a broader perspective Its central thesis is that cultural values and expectations play a dominant role in understanding the structure and function of special education While theories of the social construction of disability have been written about in a growing body of research since the 1960s no attempt has been made to create a cross cultural framework This work offers such a framework Eight chapters written by educators in each country s educational system cover the following nations China Great Britain Hungary Japan Iran Pakistan United States and Zimbabwe Historical discussions in each chapter provide a context for current practice An index and illustrations are also included

Teacher Education and the Development of Practical Judgement Ruth Heilbronn, 2011-11-03 Current conceptions of teacher training reflect key issues in professional practices Two prevailing views seem to be in conflict the first is that a teacher ought to be able to act as an autonomous professional trusted to have and apply subject knowledge through the exercise of judgement The second conception views the teacher more as a deliverer of a specific curriculum defined centrally in various government sponsored strategies Much has been written on the development of the reflective practitioner as crucial to the first conception and a strong critique of the audit culture in education has emerged Currently we are at a significant moment in teacher education a lighter touch KS3 curriculum and the instigation of new standards for the award of qualified teacher status QTS The QTS standards are important as they are set to form the basis of standards at all levels of teaching This book examines in depth current education and suggests why and how teachers need to develop and exercise practical knowledge and understanding how standards assessment alone cannot support this teacher formation and what good formation might be The nature of practical knowledge is analysed using some concepts from the work of John Dewey in two theoretical chapters 4 and 5 The current standards based model of teacher training in England is predominantly instrumentalist in its application of technical rationality and unsuited to the formation of teachers However the often invoked concept of the reflective practitioner is underdetermined and a conception of reflection is needed to illuminate its contribution to the development of practical judgement The book s argument applies more widely to the debate between deregulators and professionalisers in other spheres of economic and social activity In asking specific questions about teacher education questions about the aims of education within specific conditions are raised

African Politics and Society in the 21st Century Tyodzua Atim, 2013-07-30 After more than one hundred years of statehood most African countries are still facing serious challenges of political instability low growth underdevelopment and stagnation These challenges have created a dysfunctional African society and destroyed the heroic and proud myth of resilience and hard work associated with a typical African The book has analyzed the trends and dynamics of the breakdown of family and institutional values which have necessitated the classification of most African states as failed While the book is of the opinion that in as much as the relationship between Africa and the West has contributed to the continent's current predicaments Africa's problems are predominantly self-induced and are traced from the stereotypical culture of lack of idealism The book has empirically demonstrated that this culture has hindered initiative and promoted mediocrity deceit and tyranny on the part of African leadership while the politics of exclusion has promoted the culture of self-resignation and fratricidal conflicts on the continent The book has also proved that the current wave of democratization in Africa particularly the electoral process as dramatized rituals that seek to legitimate the authority of the ruling class

Globalisation and Education Policy Reform in Botswana Richard Tabulawa, 2023-07-21 This book uses the global local dialect approach to explicate education policy reform in Botswana and interrogates the practical effects of the various education policies on curriculum pedagogy and governance of the Botswana General Education system Considering the effect of three reform policies since Botswana's Independence in 1966 the book

evaluates the performance of each of the policies and examines their consequences in terms of the interplay of global forces and domestic pressures. The result of this interplay has been an education landscape that while reflecting globally circulating education discourses markedly differs from those same discourses. The book argues that the State in Botswana has appropriated education policy to legitimate itself in times of crisis and that each policy has improved access to general education but collectively have failed to improve its quality making suggestions for how this can be improved in the future. As the first book of its kind to delve into education in Botswana from a single authored critical lens, the book will be a highly relevant reading for academics, researchers and post graduate students of African education, comparative education, education policy and curriculum studies. *Education Policy, Theories, and Trends in the 21st Century* Izhak Berkovich, 2021-01-25. This book provides a highly accessible overview of public education policy. It organizes knowledge about 21st century education policy around two main topics: the policy process and the discourse on public education policy. This unique organization provides a novel lens for better understanding the dynamics and contents of current education policy making. The work also offers a broad overview of theories of public policy, economics, demography, sociology, history and psychology. Each chapter includes a discussion of data derived from the international and Israeli contexts. The book provides a series of valuable insights relevant to researchers, practitioners and policymakers interested in understanding the multifaceted aspects that shape contemporary education policy. *Education Policy, Practice and the Professional* Jane Bates, Sue Lewis, Andy Pickard, 2019-03-21. In this introduction to educational policy, practice and professionalism, the authors focus first on providing an historical overview of English policy from the state's first interventions in education through to Thatcherism and the election of the Blair government. Chapters then explore the key contemporary policies of recent times and offer a critique on how they have worked in practice with reference to the hysteria that often surrounds education policy. An important theme is media representation of educational matters and the effects this has on the teaching profession. Commentaries and case studies are presented throughout providing an accessible link to what it was really like to learn, teach and live at the time the policy was in place. This new edition now includes an account of the measures taken by the Coalition Government of 2010-15, examining the Coalition's continuities with the previous administration whilst also exploring departures from previous thinking and practices, updated references and case studies throughout to represent new research and legislation since the first edition, an extended discussion of globalization and global policy, borrowing further coverage of social justice theory including a perspective on identity theory and the role of education in the development of identity and the marginalisation of individuals and groups, a new historical chapter covering the period 1945 to 1997, a summary of the development of the curriculum and a critique of the 2014 National curriculum as pioneered by Michael Gove and a new conclusion setting out the trajectory of current policies and how this may affect educational practitioners. This is essential reading for all undergraduate students studying education policy and practice. **Education Policy and Realist**
