## **Educational Leadership In An Age Of Accountability:**

Educational Leadership in an Age of Accountability Daniel L. Duke, Margaret Grogan, Pamela D. Tucker, Walter F. Heinecke, 2012-02-01 The insistence by policymakers and politicians that educators be held accountable for student outcomes has resulted in dramatic shifts in the responsibilities of department chairs principals and superintendents Educational Leadership in an Age of Accountability explores these changes in Virginia following its implementation of an ambitious accountability plan that called for standards of learning statewide high stakes tests standards of accreditation and annual school performance report cards This book examines factors such as the fate of students who fail state tests achievement differences between black and white students ethical issues surrounding accountability measures and the increasing politicization of local schooling Educational Leadership in an Age of Accountability shows that accountability pressure has done more than previous reforms to foster instructional leadership *Educational Leadership in an Age of Accountability* Daniel L. Duke, Margaret Grogan, Pamela D. Tucker, Walter F. Heinecke, 2003-02-27 Using Virginia as a case study examines the role that educational leaders play in the implementation of statewide accountability plans **Wise Social Studies in an Age of High-Stakes Testing** Elizabeth Anne Yeager, O. L. Davis, 2005-08-01 The chapters in this volume illustrate how teachers are bringing creativity higher order thinking and meaningful learning activities into particular school settings despite pressures of standards and testing We chose the word wise for the title of this book and we use it frequently to describe the pedagogical practices we have identified The words powerful and ambitious are used as well The larger point as Keith C Barton makes in his chapter is that there is no necessary connection between content standards and high stakes tests on the one hand and lowlevel rote instruction on the other He reminds us as Thornton 1991 and Wiggins 1987 previously have argued that teachers play a crucial role in mediating educational policy and their intentions and interpretations have at least as much influence on classroom practice as does the content of standards and highstakes tests Barton also asserts that this makes it all the more crucial to identify the wisdom of practice that enables teachers to engage students in powerful educational experiences Differentiating School Leadership Daniel L. Duke, 2010 The proposed book maintains that schools face distinct types of challenges requiring distinct types of leadership There are not however an infinite number of types of challenges at least not for practical purposes The book focuses on four sets of challenges that any principal might confront depending on local circumstances A principal can address each set of challenges successfully but only by recognizing the distinctive nature of the challenges and adjusting his her approach accordingly This recognition of the need to make adjustments in leadership is referred to as differentiated leadership The idea of differentiated leadership has its roots in contingency theory situational leadership theory and path goal theory Northouse 2007 That the concept of leadership requires differentiation is further evidenced by the variety of adjectives used to modify the term instructional leadership moral leadership distributed leadership servant leadership normative leadership and so on In recent years

educators have been attracted to the notion of differentiated instruction. They have recognized that one form of instruction is unlikely to address the needs of all students. The approach begins with actual situations confronting contemporary principals and then analyzes the kinds of leadership functions most likely to handle the situations effectively. The book opens with an introduction to the idea of differentiated leadership and why it is important for principals to understand how different schools may face very distinct sets of challenges. Trying to apply a one size fits all type of leadership can have disastrous results. The introduction also contains an overview of organizational diagnostics and the kinds of data needed to assess the particular kinds of challenges presented by a particular school at a particular point in time.

**Transnational Influences on Values and Practices in Nordic Educational Leadership** Leif Moos, 2013-03-15

This book explores to what extent transnational influences change national local values and practices in the Nordic educational systems. It provides country cases and thematic chapters that give nuanced insights into the influence of transnational agencies on national governance and discourses. It describes how national discourses and regulation influences school leadership values culture and practice in competition with traditional values. The transnational and global discourse on educational leadership is mostly formed according to Anglo American thinking and tradition. Pivotal foundations of this discourse are strong hierarchical societies, class societies with liberal democracies and clearly streamed education systems. The Nordic discourse however builds on a more equal society and flat hierarchies with participatory democracy and on comprehensive schooling with strong local community roots. Leadership thinking and practices are formed by the culture and context they are part of, they are primarily shaped by the national local values traditions and practices and only partially shaped by politics discourses and literature. Due to the fact that a great deal of the literature that is being used in the Nordic contexts is of Anglo American origin and many of the research projects have Anglo American foundations it is difficult to distinguish the sources for leadership thinking and practice. This book distinguishes the Nordic from the Anglo American thinking and presents important findings and arguments for leadership practitioners inside as well as outside the Nordic countries.

*Handbook of Research on Educational Leadership for Equity and Diversity* Linda C. Tillman, James Joseph Scheurich, 2013-08-21. The rapid growth of diversity within U S schooling and the heightened attention to the lack of equity in student achievement school completion and postsecondary attendance has made equity and diversity two of the principle issues in education educational leadership and educational leadership research. The Handbook of Research on Educational Leadership for Equity and Diversity is the first research based handbook that comprehensively addresses the broad diversity in U S schools by race ethnicity culture language gender disability sexual identity and class. The Handbook both highly values the critically important strengths and assets that diversity brings to the United States and its schools yet at the same time candidly critiques the destructive deficit thinking biases and prejudices that undermine school success for many groups of students. Well known chapter authors explore diversity and related inequities in schools and the achievement problems these issues present to school leaders. Each

chapter reviews theoretical and empirical evidence of these inequities and provides research based recommendations for practice and for future research Celebrating the broad diversity in U S schools the Handbook of Research on Educational Leadership for Equity and Diversity critiques the inequities connected to that diversity and provides evidence based practices to promote student success for all children
