twofold purpose of Educational Psychology to help pre service teachers understand their future students better and to help them understand all aspects of the teaching learning situation The pursuit of these two purposes leads to the ultimate goal of this text namely to help pre service teachers become increasingly able to promote student learning development and potential when it becomes their turn to step into the classroom and take full time responsibility for their own classes

An Educational Psychology Textbook Equity,2014-10-10 The first half of the book focuses on broader questions and principles taken from psychology per se and the second half focuses on somewhat more practical issues of teaching All parts of the book draw on research theory and practical wisdom wherever appropriate Chapter 2 is about learning theory and Chapter 3 is about development Chapter 4 is about several forms of student diversity and Chapter 5 is about students with disabilities Chapter 6 is about motivation Following these somewhat more basic psychological chapters we turn to several lasting challenges of classroom life challenges that seem to be an intrinsic part of the job Chapter 7 offers ideas about classroom management Chapter 8 ideas about communicating with students Chapter 9 about ways to assist students complex forms of thinking and Chapter 10 about planning instruction systematically The book closes with two chapters about assessment of learning

Learning, Social Interaction and Diversity - Exploring Identities in School Practices Eva Hjärne,Geerdina van der Aalsvoort,Guida de Abreu,2012-09-05 The main idea of the book is to contribute to a broader understanding of learning identity and diversity by presenting actual research findings that were retrieved from classroom settings and related social practices Learning is to a large extent an ongoing social process as both students and their teachers learn by being part of shared social practices through social interactions that facilitate learning gains Sociocultural research shows that the organization of schooling promotes or restricts learning and is a crucial factor to understand how children from a diversity of backgrounds profit from instruction This is a first urgent issue to be considered by teachers and teacher education in our socio and culturally diverse society A second issue is the on going debate about learning as a process that involves the construction of identities in schools and classrooms and in the transitions between school and home practices Last but not least since school practices can be addressed from the perspective of diversity and special educational needs an on going discussion about optimizing

pedagogical approaches is of main importance to allow maximum educational effectiveness Our potential audience for this book are researchers post graduate students in education and psychology teachers teacher education other academics and policy makers
