Business Education and Training Samuel M. Natale, Robert P. Hoffman, Geoff Hayward, 1998 Copublished with Oxford Philosophy Trust this volume is a collection of the proceedings of a conference organized around four broad themes connected with a wider concern about the nature of lived experience the construction of such experience through language and the values imminent in that language Managerial Ethics Marshall Schminke, 1998-08-01 One of the greatest strengths of business ethics research lies in the diversity of backgrounds of those interested in knowing more about it Where else could we find moral philosophers industrial psychologists political scientists and organizational sociologists hard at work exploring the same issues These scholars bring to the table an intriguing mix of skills and viewpoints many of which may be quite different from and complementary to those trained in functional areas of business like management However this diversity also reflects a weakness Researchers from such different backgrounds may be either unable or unwilling to talk to and work with each other in understanding more about these issues This book bridges the gap and provides a basic reference volume for current business ethics researchers Second it stimulates new ways of thinking about and creating interest in linking management and ethics among those researchers Third it triggers management and ethics researchers who do not

currently study business ethics problems to consider the implications of each to their current interests The central theme of the book is that efforts must be made to better integrate management and ethical theory Although the market contains a number of good business ethics books none combines management theory with ethical theory on a chapter by chapter topic by topic basis This book bridges the theoretical empirical and at times practical gap between management and ethical scholars

Neoliberalism, the Security State, and the Quantification of Reality David R. Lea, 2016-12-14 As the security state grows in power and dominance commercial and financial interests increasingly penetrate our social existence Neoliberalism the Security State and the Quantification of Reality addresses the relationship between these two trends in its discussion of neoliberalism financialization and managerialism with a particular focus on the decline of professionalism the restructuring of tertiary education and the university's abandonment of the humanities Additionally David Lea links these developments with the failings of democratic institutions the growth of the disciplinary society and the emergence of the security state which relentlessly governs by extraordinary fiat dividing disempowering and excluding Lea identifies one such linkage in the common form of rationality which underlies contemporary approaches to reality Others have noted that one of the most notable political developments of the last thirty years or so has been increasing public and governmental demand for the quantification of social phenomena Moreover A W Crosby has attributed Europe's unprecedented imperial success which began in early European Modernity to a paradigmatic shift from a qualitative world view grounded in Platonic and Neo Platonic idealism to a more quantitative world view Nevertheless this quantitative approach towards the natural and social worlds alienates humans from other species and even from ourselves and fails to represent life as we actually experience it While a quantitative world view may have facilitated imperial success and the interlocking exercise of power and authority by the state and the economically empowered this instrumental form of thinking rationales strategies and facilitates policies that restrict and vitiate individual autonomy to create a seamless controlled conformity This form of thinking that relies on the quantification of natural and social phenomena creates a value free equivalency which at the same time invidiously divides society into the wealthy and the impoverished the advantaged and the exploited the politically included and the excluded
