Arnold, project manager for Michigan Modern, have curated nearly thirty essays and interviews from a number of prominent architects, academics, architectural historians, journalists, and designers, including historian Alan Hess, designers Mira Nakashima, Ruth Adler Schnee, and Todd Oldham, and architect Gunnar Birkerts, describing Michigan's contributions to Modern design in architecture, automobiles, furniture, and education.

**Overdrive** Wim de Wit, Christopher James Alexander, 2013 This is a fascinating and intelligently illustrated study of architectural innovation in Los Angeles. From 1940 to 1990, Los Angeles rapidly evolved into one of the most populous and influential industrial, economic, and creative capitals in the world. During this era, the region was transformed into a laboratory for cutting edge architecture. *Overdrive* examines these experiments and their impacts on modern design, reframes the perceptions of Los Angeles' dynamic built environment, and amplifies the exploration of the city's vibrant architectural legacy. The drawings, models, and images highlighted by *Overdrive* reveal the complex and often underappreciated facets of Los Angeles and illustrate how the metropolis became an internationally recognized destination with a unique design vocabulary, canonical landmarks, and a coveted lifestyle.

**Temples for a Modern God** Jay M. Price, 2012-11-02 *Temples for a Modern God* is one of the first major studies of American religious architecture in the postwar period, and it reveals the diverse and complicated set of issues that emerged just as one of the nation's biggest building booms unfolded. Jay Price tells the story of how a movement consisting of denominational architectural bureaus, freelance consultants, architects, professional and religious organizations, religious building journals, professional conferences, artistic studios, and specialized businesses came to have a profound influence on the nature of sacred space. Debates over architectural style coincided with equally significant changes in worship practice. Meanwhile, suburbanization and the baby boom required a new type of worship facility, one that had to attract members and serve a social role as much as honor the Divine. Price uses religious architecture to explore how Mainline Protestantism, Catholicism, Judaism, and other traditions moved beyond their ethnic, regional, and cultural enclaves to

create a built environment that was simultaneously intertwined with technology and social change yet rooted in a fluid and shifting sense of tradition Price argues that these structures as often mocked as loved were physical embodiments of a significant if underappreciated era in American religious history [Architecture](#) ,2000 [Los Angeles Magazine](#) ,1998-01
