Ronald E. Schmitt, 2024-04-22 *Sullivan* offers a visual and historical tour of a unique but often overlooked facet of modern American architecture derived from Louis Sullivan. Highly regarded in architecture for inspiring the Chicago School and the Prairie School, Sullivan was an unwilling instigator of the method of facade composition later influenced by Frank Lloyd Wright, William Gray Purcell, and George G. Elmslie, that came to be known as Sullivanesque. Decorative enhancements with botanical and animal themes, Sullivan's distinctive ornamentation mitigated the hard geometries of the large buildings he designed, coinciding with his form follows function aesthetic. Sullivan's designs offered solutions to problems presented by new types and scales of buildings. Widely popular, they were also widely copied, and the style proliferated due to a number of Chicago-based interests, including the Radford Architectural Company and several decorative plaster and terra cotta companies. Stock replicas of Sullivan's designs, manufactured by the Midland Terra Cotta Company and others, gave distinction and focus to utilitarian buildings in Chicago's commercial strips and other confined areas such as the downtown districts of smaller towns. Mass-produced Sullivanesque terra cotta endured as a result of its combined economic and aesthetic appeal, blending the sophistication of high architectural art with the pragmatic functionality of building design. Masterfully framed by the author's photographs of Sullivanesque buildings in Chicago and throughout the Midwest, Ronald E. Schmitt's in-depth exploration of the Sullivanesque tells the story of its evolution from Sullivan's intellectual and aesthetic foundations to its place as a form of commercial vernacular. The book also includes an inventory of Sullivanesque buildings. Honorable Mention recipient of the 2002 PSP Awards for Excellence in Professional Scholarly Publishing. *Along Route 66* Quinta Scott, 2001-11-15 It was the way out. Invented on the cusp of the depression, Route 66 was the road out of the mines, off the farm, away from troubled Main Street. It was the road to opportunity. Between 1926 and 1956, many people from the southern and plains states trekked west to California on Route 66, the Mother Road. Some never reached California. Instead, they settled along the road, building restaurants, tourist attractions, gas stations, and motels. The architecture of each structure reflected regional building traditions and the difficulties of the times. The designs of buildings and signs served as invitations for passing travelers to stop, fill their tanks, have a bite, and stay the night. *Along Route 66* describes the architectural styles found along the highway from Chicago, Illinois, to Santa Monica, California, and pairs photos with stories of the buildings and of the people who built them, lived in them, and made a living from them. With striking black and white images and unforgettable oral histories of this rapidly disappearing architecture, Quinta Scott has documented the culture of America's most famous road. **AIA Guide to the Twin Cities** Larry Millett, 2007 Get ready to discover the great architectural mecca that is Minneapolis and St. Paul.
