Charles Deeming, S. James Reynolds, 2015-08-13 Nests Eggs and Incubation brings together a global team of leading authorities to provide a comprehensive overview of the fascinating and diverse field of avian reproduction Starting with a new assessment of the evolution of avian reproductive biology in light of recent research the book goes on to cover four broad areas the nest the egg incubation and the study of avian reproduction New research on nest structures egg traits and life history is incorporated whilst contemporary methodologies such as self contained temperature probes and citizen science are also discussed Applied chapters describe how biological knowledge can be applied to challenges such as urbanisation and climate change The book concludes by suggesting priorities for future research This book builds upon the foundations laid down by Charles Deeming's 2002 work Avian Incubation available for readers of this book to access online for free much of which remains relevant today Read in conjunction with this previous volume it provides an up to date and thorough review of egg biology nest function and incubation behaviour which will be an essential resource for students of avian biology as well as both professional and amateur ornithologists working in the field of avian reproduction Oology and Ralph's Talking Eggs Carrol L. Henderson, 2009-02-17 Before modern binoculars and cameras made it possible to observe birds closely in the wild many people collected eggs as a way of learning about birds Serious collectors called their avocation oology and kept meticulous records for each set of eggs the bird's name the species reference number the quantity of eggs in the clutch the date and location where the eggs were collected and the collector's name These documented egg collections which typically date from the nineteenth and early twentieth centuries now provide an important baseline from which to measure changes in the numbers distribution and nesting patterns of many species of birds In Oology and Ralph's Talking Eggs Carrol L. Henderson uses the vast egg collection of Ralph Handsaker an Iowa farmer as the starting point for a fascinating account of oology and its role in the origins of modern birdwatching scientific ornithology and bird conservation in North America

Henderson describes Handsaker s and other oologists collecting activities which included not only gathering bird eggs in the wild but also trading and purchasing eggs from collectors around the world Henderson then spotlights sixty of the nearly five hundred bird species represented in the Handsaker collection using them to tell the story of how birds such as the Snowy Egret Greater Prairie Chicken Atlantic Puffin and Wood Duck have fared over the past hundred years or so since their eggs were gathered Photos of the eggs and historical drawings and photos of the birds illustrate each species account Henderson also links these bird histories to major milestones in bird conservation and bird protection laws in North America from 1875 to the present
