Congress. Senate. Committee on Foreign Relations, 1992 Routledge Handbook of Global Health Rights Clayton Ó Néill, Charles Foster, Jonathan Herring, John Tingle, 2021-05-30 This book examines the idea of a fundamental entitlement to health and healthcare from a human rights perspective The volume is based on a particular conceptual reasoning that balances critical thinking and pragmatism in the context of a universal right to health Thus the

primary focus of the book is the relationship or contrast between rights based discourse jurisprudential arguments and real life healthcare contexts The work sets out the constraints that are imposed on a universal right to health by practical realities such as economic hardship in countries lack of appropriate governance and lack of support for the implementation of this right through appropriate resource allocation It queries the degree to which the existence of this legally enshrined right and its application in instruments such as the International Covenant on Economic Social and Cultural Rights ICESCR and the Universal Declaration of Human Rights UDHR can be more than an ephemeral aspiration but can actually sustain promote and instil good practice It further asks if social reality and the inequalities that present themselves therein impede the implementation of laudable human rights particularly within marginalised communities and cadres of people It deliberates on what states and global bodies do or could do in practical terms to ensure that such rights are moved beyond the aspirational and become attainable and implementable Divided into three parts the first analyses the notion of a universal inalienable right to health care from jurisprudential anthropological legal and ethical perspectives The second part considers the translation of international human rights norms into specific jurisdictional healthcare contexts With a global perspective it includes countries with very different legal economic and social contexts Finally the third part summarises the lessons learnt and provides a pathway for future action The book will be an invaluable resource for students academics and policymakers working in the areas of health law and policy and international human rights law

Cultural Human Rights Francesco Francioni, Martin Scheinin, 2008 What is the relationship between culture and human rights Can the idea of cultural rights which are predicated on the distinctiveness and exclusivity of a community's beliefs and traditions be compatible with the concept of human rights which are universal and an inherent TM to all human beings If we accept such compatibility what is the actual content of cultural rights Who are their beneficiaries individuals or peoples or groups as collective entities And what precise obligations do cultural rights pose upon states or other actors in international law or for the international community as a whole International instruments on the protection of human rights do not provide self evident answers to these questions This book seeks to analyse these dilemmas and to assess the impact that they are having on international law and the development of a coherent category of cultural human rights

Violence against Women under International Human Rights Law Alice Edwards, 2010-12-23 Since the mid 1990s increasing international attention has been paid to the issue of violence against women However there is still no explicit international human rights treaty prohibition on violence against women and the issue remains poorly defined and understood under international human rights law Drawing on feminist theories of international law and human rights this critical examination of the United Nations legal approaches to violence against women analyses the merits of strategies which incorporate women's concerns of violence within existing human rights norms such as equality norms the right to life and the prohibition against torture Although feminist strategies of

inclusion have been necessary as well as symbolically powerful for women the book argues that they also carry their own problems and limitations prevent a more radical transformation of the human rights system and ultimately reinforce the unequal position of women under international law

Ethics of Human Rights A. Reis Monteiro, 2014-03-11 This volume focuses on the ethical significance of human rights aiming at contributing to a universal culture of human rights with deep roots and wide horizons Its purpose scope and rationale are reflected in the three part structure of the manuscript Part I has a broad introductory historical theoretical and legal character Part II submits that an Ethics of Human Rights is best understood as an Ethics of Recognition of human worth dignity and rights Moreover it is argued that human worth consists in the perfectibility of the human species rooted in its semiotic nature to be accomplished through the perfecting of human beings for which the right to education is key In Part III the main legal and political outcomes of the Human Rights Revolution are described and answers to the most lasting and common criticisms of human rights are provided To conclude the human stature of the Big Five drafters of the Universal Declaration of Human Rights is profiled and the priority that should be recognized to human rights education is highlighted Some appendices supplement the manuscript While making a case for the high value and liberating power of the idea and ideal of human rights objections controversies and uncertainties are not at all overlooked and emerging issues are explored The diversity of content of this volume meets many needs of the typical syllabus for a human rights course

Australia and the Birth of the International Bill of Human Rights, 1946-1966 Annemarie Devereux, 2005 Australia and the Birth of the International Bill of Human Rights provides the first in depth examination of Australia's first reactions to international human rights during the negotiations for the International Bill of Rights the Universal Declaration of Human Rights the ICCPR and ICESCR It follows Australian policy from 1946 the first year in which the United Nations began discussing a Bill of Rights

until 1966 when the twin Covenants were finalized The book looks at what successive Australian Governments understood by human rights and how they responded to discussion of sensitive domestic topics such as immigration policies self determination for inhabitants of trust territories equal pay for men and women and balancing human rights and national security As well as considering Australian policies towards substantive rights the book looks at Australian policies towards international schemes for protecting rights including early proposals for an International Court of Human Rights and its later support for more modest technical expertise based assistance for States debates often taking place against the background of highly politicised issues such as the Cold War and the fight against apartheid In looking at this 20 year period the book demonstrates the way in which Australian policy changed substantially over time as between Labor and Liberal administrations between Ministers and bureaucrats and as between decision makers with markedly distinct visions of the ideal relationship between citizens and a State and the individual State and the international community In highlighting the diversity of views about human rights this book thus challenges the notion that Australia has historically supported a universally understood set of human rights norms and underlines the number of variables which may be affecting ongoing implementation of human rights standards The United Nations System for Protecting Human Rights Dinah L.

Shelton,2016-12-05 The United Nations has been at the forefront of developing the international law of human rights for nearly seven decades This volume brings together the leading research articles on the development of human rights law by the United Nations and also includes essays on issues relating to standard setting institutional evolution and the creation of monitoring procedures **Europe and Extraterritorial Asylum** Maarten Den Heijer,2012-03-01 Increasingly European and other Western states have sought to control the movement of refugees outside their borders To do this states have adopted a variety of measures including carrier sanctions interception of migrants at sea posting of immigration officers in foreign countries and external processing of asylum seekers This book focuses on the legal implications of external mechanisms of migration control for the protection of refugees and irregular migrants The book explores how refugee and human rights law has responded to the new measures adopted by states and how states have sought cooperation with other actors in the context of migration control The book defends the thesis that when European states attempt to control the movement of migrants outside their territories they remain responsible under international law for protecting the rights of refugees as well as their general human rights It also identifies how EU law governs and constrains the various types of pre border migration enforcement employed by EU Member States and examines how unfolding practices of external migration control conform with international law This is a work which will be essential reading for scholars and practitioners of asylum and refugee law throughout Europe and the wider world The book received The Max van der Stoep Human Rights Award 2011 first prize category dissertations and the Erasmianum Study Prize 2011
