Morality, and Beauty Randall B. Bush, 2019-07-01 Randall B Bush analyzes the ways unacknowledged axiological assumptions e g about what is important why human beings are valuing creatures and where the capacity to value comes from prejudice the perspectives and approaches of various academic disciplines especially in the social sciences and the humanities The disciplines of ethics and aesthetics provide the most useful tools for a philosophy of value but academic overspecialization has compartmentalized and segregated these disciplines from others threatening to unravel the unity of conceptions of the moral and the beautiful in human existence Bush argues that a dialectical approach to conflicts between ethics and aesthetics can point to a broader axiological vision informed by a Trinitarian conception of reality in which the whole a coherent theory of value is more than the sum of its parts **Pause Now** Lyla Yastion, 2009-03-16 This handbook in

An Analysis of Rene Descartes's Meditations on First Philosophy Andreas Vrahimis,2017-07-05 Ren Descartes s 1641 Meditations on First Philosophy is a cornerstone of the history of western thought One of the most important philosophical texts ever written it is also a masterclass in the art of critical thinking specifically when it comes to reasoning and interpretation Descartes sought to do nothing less than create a new foundation for the pursuit of knowledge whether philosophical scientific or theological To that end he laid out a systematic programme that reinterpreted prior definitions of knowledge and reasoned out a systematic means of obtaining verifying and building on existing human knowledge To this end Descartes created a definition of true knowledge as that which is based on things which cannot be called into doubt by radical scepticism If he suggests we can find a belief that cannot be called into doubt this will provide a solid foundation upon which we can build systematic reasoning This cartesian method as it has come to be known is a blueprint for reasoning that continues to shape the study of philosophy today a careful weighing of possibilities searching out solid ground and building on it step by step

Argument and Persuasion in Descartes' Meditations David Cunning,2010-08-03 This monograph on Descartes Meditations shows that it is as much about pedagogy as it is about truth Every single claim of the Meditations is advanced from the first person point of view of Descartes meditator who is not a Cartesian at the start of inquiry Cunning s reading shows that The Meditations is the transcript of his cognitive progress This new reading of a canonical philosophical text will interest all scholars of early modern philosophy

Hume and the Demands of Philosophy Nathan I. Sasser,2022-03-02 Hume and the Demands of Philosophy Science Skepticism and Moderation offers a comprehensive interpretation of the relationship between Hume s scientific project and his skepticism Nathan I Sasser argues that Hume is a radical epistemic skeptic who has purely practical reasons for retaining the beliefs that are essential for ordinary life and scientific research On Sasser s reading the key to Hume s epistemology is his conception of philosophy as a normative method of inquiry governing the special sciences Philosophy approves of the mental faculties that produce reasoning and sensory beliefs But sensory beliefs and the products of reason themselves face insuperable rational defeater arguments and because they do philosophy demands that we suspend these beliefs Hume s solution to this skeptical dilemma is to point out the fatal practical consequences of doing so He advises us not to submit to the demands of philosophy when doing so is neither agreeable nor useful to ourselves or others Hume s moderate approach to philosophy recognizes that if the human mind is not created by a beneficent deity then we must learn to live with the divergence between the epistemic demands of philosophy and the practical demands of life
