Working Group on Guidelines for 'Best Practice' and Sustainability in the Sustainable Management of Tropical Forests with Particular Application to the Natural Forests, 1990      The Management of Tropical Moist Forest Lands Duncan Poore, Jeffrey Sayer, 1991 This book is a comprehensive guide to fundamental ecological principles in tropical moist forest lands This edition has been revised to encompass our increased knowledge and

understandings of the complexities of forest management It addresses the cross cutting issues the effects of government policies land allocation and infrastructure development in forest lands An analysis is made regarding various forest uses forests for wood forests for agriculture and forests for nature conservation and environmental protection FAO Forestry Paper , ITTO Guidelines for the Sustainable Management of Natural Tropical Forests International Tropical Timber Organization,1992 **Making forest concessions in the tropics work to achieve the 2030 Agenda** Food and Agriculture Organization of the United Nations,2018-07-30 The specific objective of these Voluntary Guidelines is to promote the sustainable management of public production natural forests in tropical countries through forest concessions thereby fulfilling their potential contribution to the achievement of Agenda 2030 Forest concession regimes are treated here as forest policy instruments and should be aligned with the sustainable forest management objectives agreed by countries in the UNFF The current Guidelines intend to serve as guidance for making forest concessions an effective economic instrument of forest policy in the context of the 2030 Agenda transforming them into an instrument capable of delivering sustainable forest management in all its dimensions and generating socio economic benefits to relevant stakeholders **Beyond the Guidelines** □□□□□□□□,1992 **Managing Forests as Common Property** J. E. M. Arnold,Food and Agriculture Organization of the United Nations,1998-01-01 The purpose of this study is to bring together available information about the role of common property as a system of governance and its present relevance to forest management and use to review the historical record of common property systems that have disappeared or survived to examine the experience of selected contemporary collective management programmes in different countries and to identify the main factors that appear to determine success or failure at the present time *Criteria and Indicators for Sustainable Management of Natural Tropical Forests* International Tropical Timber Organization,1998 The Forest Landscape Restoration Handbook Stewart Maginnis,Jennifer Rietbergen-McCracken,Alastair Sarre,2012-05-04 Forest loss and degradation have caused a decline in the quality of ecosystem services around the world But fixing the problem takes more than just planting trees practitioners increasingly realize that a landscape approach is essential This handbook authored and edited by international authorities in the field of forestry is the first practical guide to using forest landscape restoration FLR to repair the damage done to forest lands by poor land management practice Using research backed by respected institutions such as ITTO and the World Conservation Union IUCN it explains how to increase the resilience of landscapes and the communities they support through FLR The main aim of FLR is not to re establish pristine forest even if this were possible rather the objective is to make landscapes more resilient and thereby keep future management options open It also aims to support communities as they strive to increase and sustain the benefits they derive from land management This book explains the concept of FLR and guides the reader through the steps that must be taken to put it into practice It is an indispensable aid for practitioners in all aspects of forestry and natural resource management Forestry Policies in the Caribbean Food and Agriculture

Organization of the United Nations,1998-01-01      **Governance Principles for Concessions and Contracts in Public Forests** Food and Agriculture Organization of the United Nations,Andrew Frank Howard,John A. Gray,2001-01-01 This report reviews the types of contracts used in the management of public forests Agreements for forest utilisation are analysed along with contracts for the acquisition of goods and services The study illustrates the importance of an effective institutional and legal framework The key elements to consider when awarding contracts are detailed along with valuation administration and ensuring the terms of the contract are fulfilled Special attention is given to the importance of awarding contracts through a transparent and competitive process      Assessing the International Forest Regime Richard Tarasofsky,1999 Provides an assessment of the international forest regime in reponse to calls from many quarters including the UN Intergovernmental Forum on Forests IFF and the World Commission on Forests and Sustainable Development as well as several NGOs The focus is mainly on action taken by countries at the global level in the framework of legally binding instruments and institutions It builds on previous analyses of the international forest regime by looking beyond the legal mandates to begin exploring the actual performance of the components against their mandates With the Intergovernmental Panel on Forests IPF Proposals for Action as the point for departure the effectiveness and impact of individual legal instruments and global institutions are analyzed as is the potential for synergy between them      *Forestry Policies in the Caribbean* ,1998      New Perspectives in Forestry Education ,2008      *Trees, forests and land use in drylands: the first global assessment* Food and Agriculture Organization of the United Nations,2019-11-29 Drylands cover 41 percent of the Earth s land surface This publication presents the results of the first global assessment of trees forests and land use in these lands The assessment breaks new methodological ground it relies on the visual interpretation of freely available satellite images carried out by more than 200 experts in a series of regional workshops Using a tool called Open Foris collect Earth developed by FAO in collaboration with Google participants gathered and analysed information for more than 200 000 sample plots worldwide For each region the report summarizes the distribution of forests other wooded land and other land uses including grasslands croplands built up areas and barren land across all drylands and by aridity zone It also estimates tree canopy cover shrub cover forest type and presence of trees outside forest Indicating that the global drylands contain more than one quarter of the world s forest area and that trees are present on 31 percent of the world s dryland area the report provides a baseline for future monitoring and will support countries in their efforts to identify appropriate investments for the restoration and sustainable management of drylands      Beyond the Guidelines Proceedings of the Conference of Senior Foresters,International Tropical Timber Organization,1992
