Choose Wisely Barry Schwartz, Richard Schuldenfrei, 2025-09-23 A leading psychologist and philosopher challenge the shortcomings of rational choice theory and propose a new framework for understanding decision making For many decision scientists their starting point drawn from economics is a quantitative formula called rational choice theory allowing people to calculate and choose the best options The problem is that this framework assumes an overly simplistic picture of the world in which different types of values can be quantified and compared leading to the most rational choice Behavioral economics acknowledges that irrationality is common but still accepts the underlying belief from economics of what a rational decision should look like In this book Barry Schwartz and Richard Schuldenfrei offer a different way to think about the choices we make every day Drawing from economics psychology and philosophy and both inspired by and challenging Daniel Kahneman s *Thinking Fast and Slow* they show how the focus on rationality narrowly understood fails to fully describe how we think about our decisions much less help us make better ones Notably it overlooks the positive contribution that framing how we determine what aspects are most important to us contributes to good decisions Schwartz and Schuldenfrei argue that our choices should be informed by our individual constellation of virtues allowing for a far richer understanding of the decisions we make and helping us to live more integrated and purposeful lives **Crafting a Class** Elizabeth A. Duffy, Idana

the development of competitive admission and financial aid policies at a selected group of liberal arts colleges *Crafting a Class* explores how institutional decisions reflect and respond to broad demographic economic political and social forces Elizabeth Duffy and Idana Goldberg closely studied sixteen liberal arts colleges in Massachusetts and Ohio At each college they not only collected empirical data on admissions enrollment and financial aid trends but they also examined archival materials and interviewed current and former administrators Duffy and Goldberg have produced an authoritative and highly readable account of some of the most important changes that have taken place in American higher education during the tumultuous decades since the mid 1950s *Crafting a Class* will interest all readers who are concerned with the past and future directions of higher education in the United States Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
