Division of Vocational Education, 1939 **Bulletin of the International Bureau of Education** International Bureau of Education, 1941 *White Matter* Janet Sternburg, 2015-08-17 *White Matter* A Memoir of Family and Medicine is the story of a Bostonian close knit Jewish working class family of five sisters and one brother and the impact they and their next generation endured due to the popularization of lobotomy during the 20th century When Janet Sternburg's grandfather abandoned his family and her uncle Bennie became increasingly mentally ill Sternburg's mother and aunts had to bind together and make crucial decisions for the family's survival Two of the toughest familial decisions they made were to have Bennie undergo a lobotomy to treat his schizophrenia and later to have youngest sister Francie undergo the same procedure to treat severe depression Both heartrending decisions were largely a result of misinformation disseminated that popularized and legitimized lobotomy Woven into Sternburg's story are notable figures that influenced the family as well as the entire medical field In 1949 Egas Moniz was awarded the Nobel Prize in Medicine for developing the lobotomy and in the three years that followed his acceptance of the award more Americans underwent the surgery than during the previous 14 years By the early 1950s Walter Freeman developed an alternate technique for lobotomy which he proselytized during his travels throughout the country in a van he dubbed the Lobotomobile The phrase prefrontal lobotomy was common currency growing up in Janet Sternburg's family and in *White Matter* she details this scientific discovery that disconnects the brain's white matter leaving a person without feelings and its undeserved legitimization and impact on her family She writes as a daughter consumed with questions about her mother and aunts all well meaning women who decided their siblings' mental health issues would be best treated with lobotomies By the late 1970s the surgical practice was almost completely out of favor but its effects left patients and their families with complicated legacies as well as a stain on American medical history Every generation has to make its own medical choices based on knowledge that will inevitably come to seem inadequate in the future How do we live with our choices when we see their consequences *The Lexicon of Adlerian Psychology* Jane Griffith, Robert L. Powers, 2007 The Adlerian Lexicon features 106 inclusive entries of terms one entry per page associated with the Individual Psychology of Alfred Adler with a foreword by Guy J. Masater Ph.D. University of Texas at Austin president of the International Association of Individual Psychology an introduction to Adler an extensive bibliography of Adlerian materials and an index Adler who with Freud and Jung was one of the founders of modern psychology chose the term Individual Psychology to represent his emphasis on the holism of the individual individual that which cannot be divided as distinguished from a consideration of the individual in terms of part processes The Adlerian Lexicon has no competitor in the English language It serves as the authoritative reference work for practitioners students and scholars of modern psychiatry and psychology Originally published in 1984 the present text is the second edition revised and expanded
