**Military Technologies of the World** T.W. Lee, 2008-12-30 From the introduction of gunpowder to the reigning era of nuclear weapons military technological advances have been at the forefront of change These changes in weaponry have influenced the outcome of many historical events and the downfall or success of major

civilizations All nations have sought to improve military technologies in the hope of gaining the upper hand in conflict The developments in guns cannon technology warships tanks and airborne and space weapons have been crucial in the ever changing face of war While it is inherent in human nature to seek better weapons for survival the use of this weaponry will continue to make an impact on history Through careful examination of the science and engineering of these weapons persons can continue to venture into the field of military weaponry with an outlook towards the future Through the many advancements made in military weaponry our civilization is one that continues to change in the face of war Technological advancements made in this area improve upon current war tactics and often are the basis behind military warfare Technology has proven to transform history lending itself to be one of the most powerful assets of the human race Breakthroughs in military technology prove to be at the forefront of war and in many cases the result of war is directly connected through these advancements In history major civilizations have seen their rise or downfall through the elevation of weapon technology Lee delves into the engineering and science behind major weapons such as guns cannons fighter and stealth aircrafts various types of missiles attack helicopters aircraft carriers nuclear submarines main battle tanks and future weapons He comprises the knowledge behind the weapons along with an understanding of how the weapons are used and applied to modern warfare By showing how weapons have changed military warfare he explains the human nature to seek better weapons for survival protection and domination of resources American Military Shoulder Arms, Volume II George D. Moller, 2011-11-15 New data surrounding the procurement and modifications of arms produced by the national armories and under federal contract procured by the individual states and by individual members of militias is presented here for the first time This information interwoven with military political economic and social factors results in new and better definitions and a clearer understanding of the arms historical context Though this work focuses on military flintlock shoulder arms details on the federal government's procurement of arms for Indians during rapidly changing military policies of the period is also included American Military Shoulder Arms Volume II contains more than three hundred photographs As with the previous volume Volume II is written primarily for students of arms but also contains material of interest to historians museum specialists collectors and dealers of antique arms **Armed Forces**, 1982 **A Compendium of Armaments and Military Hardware (Routledge Revivals)** Christopher Chant, 2014-06-03 First published in 1987 The Compendium of Armaments and Military Hardware provides within a single volume the salient technical and operational details of the most important weapons The complete range of hardware used in land sea and air forces throughout the world at the time of publication is covered from tanks to rocket systems helicopters to cruise missiles alongside full details of size weight and operational range The book's main strength lies in the detail it gives of armament and associated ammunition capabilities and of the sensors and other electronics required for the weapons to be used effectively A key title amongst Routledge reference reissues Christopher Chant's important work will be of great value to students and professionals requiring a

comprehensive and accessible reference guide as well as to weapons buffs

Excerpt In April 1949 judgment was rendered in the last of the series of 12 Nuernberg war crimes trials which had begun in October 1946 and were held pursuant to Allied Control Council Law No 10 Far from being of concern solely to lawyers these trials are of especial interest to soldiers historians students of international affairs and others The defendants in these proceedings charged with war crimes and other offenses against international penal law were prominent figures in Hitler s Germany and included such outstanding diplomats and politicians as the State Secretary of the Foreign Office von

Weizsaecker and cabinet ministers von Krosigk and Lammers military leaders such as Field Marshals von Leeb List and von Kuechler SS leaders such as Ohlendorf Pohl and Hildebrandt industrialists such as Flick Alfried Krupp and the directors of I G Farben and leading professional men such as the famous physician Gerhard Rose and the jurist and Acting Minister of Justice Schlegelberger In view of the weight of the accusations and the far flung activities of the defendants and the extraordinary amount of official contemporaneous German documents introduced in evidence the records of these trials constitute a major source of historical material covering many events of the fateful years 1933 and even earlier to 1945 in Germany and elsewhere in Europe The Nuernberg trials under Law No 10 were carried out under the direct authority of the Allied Control Council as manifested in that law which authorized the establishment of the Tribunals The judicial machinery for the trials including the Military Tribunals and the Office Chief of Counsel for War Crimes was prescribed by Military Government Ordinance No 7 and was part of the occupation administration for the American zone the Office of Military Government OMGUS Law No 10 Ordinance No 7 and other basic jurisdictional or administrative documents are printed in full hereinafter The proceedings in these trials were conducted throughout in the German and English languages and were recorded in full by stenographic notes and by electrical sound recording of all oral proceedings The 12 cases required over 1 200 days of court proceedings and the transcript of these proceedings exceeds 330 000 pages exclusive of hundreds of document books briefs etc Publication of all of this material accordingly was quite unfeasible This series however contains the indictments judgments and other important portions of the record of the 12 cases and it is believed that these materials give a fair picture of the trials and as full and illuminating a picture as is possible within the space available Copies of the entire record of the trials are available in the Library of Congress the National Archives and elsewhere In some cases due to time limitations errors of one sort or another have crept into the translations which were available to the Tribunal In other cases the same document appears in different trials or even at different parts of the same trial with variations in translation For the most part these inconsistencies have been allowed to remain and only such errors as might cause misunderstanding have been corrected
