E. Kaufmann, H. W. Kaufmann, 2014-07-02 Extremely well written and presented and gives you every scrap of information you'll ever need on cupolas embrasures and cloches War History Online After the Napoleonic Wars the borders of Central Europe were redrawn and relative peace endured across the region but the volatile politics of the late nineteenth century generated an atmosphere of fear and distrust and it gave rise to a new era of fortress building and this is the subject of this highly illustrated new study The authors describe how defensive lines and structures on a massive scale were constructed along national frontiers to deter aggression The Germans Austro Hungarians and Czechs all embarked on ambitious building programs Artillery positions barbed wire networks casemates concrete bunkers trench lines observation posts all sprang up in a vain attempt to keep the peace and to delay the invader The strategic thinking that gave rise to these defensive schemes is described in detail in this study as is the planning design and construction of the lines themselves Their operational history in wartime in particular during the Second World War is a key element of the account A useful introduction for those wishing to develop a knowledge of fortifications and their impact on the conduct of war Firetrench The maps and plans especially the plans are numerous and extremely helpful They show the arrangement of fortifications in a way that simple text would have found impossible For those with an interest in European land fortifications of the 19th and 20th centuries this book is an excellent general survey The Coast Defense Journal **Germany's Guns, 1939-1945** Terry Gander, 1998 This is a study of the artillery weapons available for the German Army between 1939 and 1945 the new designs and their problems of manufacture and the widespread use of captured material and occupied factories Topics covered include all types of artillery including field and heavy artillery coastal guns and anti aircraft guns The Battle of France Operation Barbarossa Siege of Sebastopol and Battle for Berlin are described *The Atlantic Wall (2)* Steven J. Zaloga, 2011-03-15 Germany's Atlantic Wall was the most ambitious military fortification program of World War II Following its conquest of Western Europe Germany had to defend some 5 000km of Atlantic coastline from the Spanish border to the Arctic Circle The United States entry into the war and the inevitability of an Anglo American landing in Western Europe resulted in the fortification of this coastline along its entire length Focusing on the northern Atlantic Wall in the Low Countries and Scandinavia this title addresses the special defensive features and unique aspects of fortification in these countries such as the early focus on fortifying Norway due to early British commando raids the greater use of turreted naval guns and the establishment of first line Flak defences in the Low Countries to counter the Allied strategic bombing campaign **D-Day in Numbers** Jacob F. A History of the Second World War in 100 Maps Jeremy Black, 2020-11-18 The First World War was marked by an exceptional expansion in the use and production of military cartography But World War II took things even further employing maps charts reconnaissance and the systematic recording and processing of geographical and topographical information on an unprecedented scale As Jeremy Black one of the world's leading military and cartographic historians convincingly shows in this lavish full color book it is impossible to understand the events and outcomes of the Second World War without deep reference to mapping at all levels In World War II maps themselves became the weapons *A History of the Second World War in 100 Maps* traces how military cartography developed from simply recording and reflecting history to having a decisive impact on events of a global scale Drawing on one hundred key maps from the unparalleled collections of the British Library and other sources many of which have never been published in book form before Jeremy Black takes us from the prewar mapping programs undertaken by both Germany and the United Kingdom in the mid 1930s through the conflict's end a decade later Black shows how the development of maps led directly to the planning of the complex and fluid maneuvers that defined the European theater in World War II for example aerial reconnaissance photography allowed for the charting of beach gradients and ocean depths in the runup to the D Day landings and the subsequent troop movements at Normandy would have been impossible without the help of situation maps and photos In the course of the conflict both in Europe and the Pacific the realities of climate terrain and logistics recorded on maps overcame the Axis powers Maps also became propaganda tools as the pages of *Time* outlined the directions of the campaigns and the Allies dropped maps from their aircraft In this thrilling and unique book Jeremy Black blends his singular cartographic and military expertise into a captivating overview of World War II from the air sea and sky making clear how fundamental maps were to every aspect of this unforgettable global conflict

War and Technology

Jeremy Black, 2020-03-04 A scholarly overview of military technology throughout history starting roughly in the 15th century and extending into the future insightful Publishers Weekly In this engaging book Jeremy Black argues that technology neither acts as an independent variable nor operates without major limitations This includes its capacity to obtain end results as technology's impact is far from simple and its pathways are by no means clear After considering such key conceptual points Black discusses important technological advances in weaponry and power projection from sailing warships to aircraft carriers muskets to tanks balloons to unmanned drones in each case taking into account what difference these advances made He addresses not only firepower but also power projection and technologies of logistics command and control

Examining military technologies in their historical context and the present centered on the Revolution in Military Affairs and Military Transformation Black then forecasts possible future trends Clear concise and thoughtful An eminently readable synthesis of historical literature on technology and war John France author of Perilous Glory The Rise of Western Military Power An interesting thought provoking work by a major military historian whose depth and wide range of knowledge across the entire sweep of world military history is without parallel Those who read this book closely will be richly rewarded for it is a mine of useful information and grist for discussion Spencer C Tucker author of The European Powers in the First World War A most useful introduction to a very complex subject and particularly valuable for its notes and references to other works Provocative and vigorously argued Highly recommended Choice
