The Search for an Effective Police Handgun ,1973 Collection of research results providing police officials and officers with comparative technical information on various types and models of handguns and ammunition Prior to standardization which occurred within police departments in the 1930 s officers were usually expected to furnish their equipment including weapons and ammunition Two factors a high degree of accuracy in the 38 S W special revolver cartridge and the convenience of police exchanging a standard ammunition led to the adoption of the S W 38 by most large departments However researchers since 1900 have presented evidence that this accepted police handgun cartridge should be reevaluated in terms of effectiveness Professor Bristow offers a review of some of that research in this collection of agency evaluations factory ballistic test reports excerpted government documents and other materials which present alternatives to the 38 special as the standard police handgun Wound ballistics considerations of velocity and shock and technical concerns over accuracy versus recoil are detailed in both descriptive and statistical terms The pros and cons of high velocity expanding bullets are presented as are the implications of using large caliber revolvers and semi automatic pistols These subjects are also discussed in the context of such larger problems as the cost risk of change and community relations versus officer protection The material is intended to aid law enforcement officials and officers who have the responsibility of choosing and justifying a handgun for their agency or themselves

The Modern Pistol and How to Shoot It Walter Winans,2011-01-01 There is now no use learning revolver shooting That form of pistol is obsolete except in the few instances where it survives for target shooting or is carried for self defence just as flintlock muskets even now survive in out of the way parts of the world If a man tries to defend himself with a revolver against another armed with an automatic pistol he is at a great disadvantage The automatic is more accurate than a revolver as the blow back does not vary as much as does the escape of gas past the cylinder in a revolver The bullet in the revolver has to jump into the cylinder whereas in the automatic it is already fitted up against the rifling before being fired The single shot pistol is the most accurate of any there being no escape of gas The automatic has not only a much longer range than the revolver although the popular idea that it can be shot accurately at a

thousand yards or more is nonsense but it cocks itself instead of having to be cocked by the thumb or trigger finger Cocking by trigger pull is such a strain on not only the trigger finger but the whole hand that after a few shots good shooting cannot be made I won all my rapid firing revolver competitions using the single action and cocking with the thumb as this rested my trigger finger With the automatic cocking is unnecessary and with its lighter recoil good scores in rapid firing are very much easier to make The penetration of the nickel coated automatic bullet propelled by its big charge of nitro powder is very great A man brought me a pistol proof cuirass to test I put a bullet at twelve yards clean through it and then through two bullet proof ones placed one behind the other I used a regulation U S 45 Automatic pistol This was before the war The inventor was disappointed He had experimented only with revolvers shooting soft leaden bullets and these his cuirass had stopped Unfortunately in its present comparatively imperfect development the automatic is the most dangerous firearm of all pistols for a novice to handle The long barrel of a rifle can be struck aside if a beginner swings it round and points it at the instructor or a nearby spectator but the short barrel of a pistol is easily pointed at and with difficulty brushed aside by the unfortunate person standing near a brandishing and flourishing man who is learning to shoot In spite of all warnings even those who ought to know better do this swinging about In fact it is the recognized way of handling a pistol according to reporters they always say So and So was brandishing a pistol if he happens to be armed
