bankruptcy will necessitate much greater attention to preventative medicine The total cost of waste disposal by our health industry is well over a billion dollars It is rising rapidly as we increasingly rely on high technology remediation measures Here too in the opinion of the authors of this work it would be prudent to give much greater attention to preventative approaches Incineration technology has largely been developed for disposing municipal solid waste MSW and hazardous waste HW As a result of the multibillion dollar funding for the Resource Conservation and Recovery Act RCRA most experts believe that pollution control is the key to minimizing toxic emissions from incinerators This view is now beginning to take hold in medical waste MW incineration as well However the authors contributing to this book have concluded that precombustion measures can be most effective in reducing the toxic products of medical waste incineration
