Traumatic Brain Injury Rehabilitation Christine Lefaivre,2014-08-07 The Lefaivre Rainbow Effect is a groundbreaking treatment for those suffering from a traumatic brain injury TBI This strategy is different from most others because it is individually designed for each client and focuses on the cognitive retraining of the brain based on pre injury lifestyle as well as the organic damage to the brain rather than

Diseases of the nervous system resulting from accident and injury Pearce Bailey,1906

Foundations of Sport-Related Brain Injuries Semyon M. Slobounov,Wayne J. Sebastianelli,2006-08-25 This book is the partial product of a conference on concussion in athletics held at the Pennsylvania State University April 29 30 2004 For a number of reasons it seemed timely to hold such a conference as well as to condense our current understanding of mechanisms predispositions and latest developments in evaluation and managements of sport related concussions in a single book format Despite dramatic advances in medicine traumatic brain injury commonly know as concussion is still one of the most puzzling and least understood injuries facing the sport medicine world today There still no universal agreement assigning the level of severity the sport related concussions nor there is any treatment besides the passage of time Medicines inability to fully understanding concussion has led us to question when it is truly safe to return an athlete to full sport participation so threat for risk of re injury is minimized The need for a multidisciplinary approach to understanding the spo related concussions stem from recent evidence that there are long lasting residual behavioral psycho social and neural disabilities that are often overlooked using current research methods The notion of transient and rapid symptoms resolution is misleading since symptoms resolution is frequently not indicative of injury resolution There are no two traumatic brain injuries alike in mechanism symptomology or symptoms resolution Most grading scales are based on loss of consciousness and post traumatic amnesia both of which occur infrequently in sport related mild traumatic brain injuries

Wrongful Convictions and the DNA Revolution Daniel S. Medwed,2017-03-30 This book examines the lessons learned from twenty five years of using DNA to free innocent prisoners and identifies lingering challenges

Brain Injury Medicine David B. Arciniegas,M. Ross Bullock,Douglas I. Katz,Jeffrey S. Kreutzer,Ross D. Zafonte,Nathan D.
