*Contemporary Phrase Structure Grammar* Robert D. Levine, Georgia M. Green, 1999 This book explores a wide variety of theoretically central issues in the framework of Head Driven Phrase Structure Grammar HPSG a major theory of syntactic representation particularly in the domain of natural language computation HPSG is a strongly lexicon driven theory like several others on the scene but unlike the others it also relies heavily on an explicit assignment of linguistic objects to membership in a hierarchically organised network of types where constraints associated with any given type are inherited by all of its subtypes This theoretical architecture allows HPSG considerable flexibility within the confines of a highly restrictive mathematically explicit formalism requiring no derivational machinery and invoking only a single level of syntactic representation The separate chapters consider a variety of problematic phenomena in German Japanese and English and suggest important extensions of and revisions to the picture of HPSG
