

# TYPES OF HEADACHES

## TENSION-TYPE HEADACHE

Tension headache is a common cause of head pain. It feels like a tight band around the head or a heavy crown, and is not pulsating or throbbing like other headaches. It may also cause neck and shoulder pain. Muscle tension, vitamin deficiency, and genetics can cause tension headaches.

## SINUS HEADACHE

A sinus headache may also cause pain at the sides and on top of the head. This symptom is caused by an infection that inflames the sinuses, making it a secondary headache. Head pain may be resolved once the inflammation has subsided.

## MIGRAINE

A severe headache is one of the symptoms of a migraine. While it usually presents as pain on one side of the head, patients may also experience this headache, throbbing from the top of the head. A migraine headache may also reach down toward the neck.

## OCCIPITAL NEURALGIA

Occipital neuralgia causes secondary headaches involving pain at the top of the head. The sensation is similar to having a tight band wrapped around your head with sudden jolts of pain or tingling feeling. Patients experience this due to the nerves from the spine to the head getting irritated.

## CLUSTER HEADACHE

Cluster headache is a condition involving severe headache at one side of the head behind an eye, radiating to the top of the head as it worsens. This pain usually happens in a pattern, either daily or weekly. Patients feel it at its peak after 5 to 10 minutes and can last for up to 3 hours.

## HYPERTENSION HEADACHE

Another condition that may result in secondary headaches at the top of the head is hypertension. Intensively high blood pressure builds up strain on the blood vessels at the cranium.

*Practical Assessment and Treatment of the Patient with Headaches in the Emergency Department and Urgent Care Clinic*

Dawn A. Marcus, Philip A. Bain, 2011-07-29 Migraine is an extremely common condition affecting 28 million Americans Fully 1 in every 6 adult women suffers from this malady Patients with migraine are frequently seen in the Emergency Room and Urgent Care Clinic for acute treatment of their headaches Headache generally accounts for nearly 3 % of all ER visits resulting in almost 35 million visits annually There currently are no widely used guidelines for the treatment of patients with headache in the ER or UCC and reducing the number of CT scans remains a key goal for administrators in many ER or urgent care settings In one study 35 drugs alone or in combination were used to treat migraine The most common medication class used was narcotics which were used in 25% of the visits The next two most commonly used classes were antiemetics and NSAIDs Only 5% of patients seen for headache received headache specific medications during their visit ER and Urgent Care physicians generally have little or no formal training in treating these patients Consequently they often feel less comfortable ruling out secondary causes of headaches and using appropriate headache treatment medications and procedures Since many patients have received narcotics in previous visits providers may view them as drug seekers Patients seen in ERs and UCCs for acute treatment of their headaches often report high levels of dissatisfaction They often end up in the ER or UCC because they don't have a formal treatment strategy for their severe headaches Health plans and insurance agencies are often frustrated by the high cost of fragmented care for patients with headaches Because of the environment that most ER and UCC providers operate in many unnecessary scans and tests are done because of uncertainty of the diagnosis and unfamiliarity of the patient Primary care physicians are also frustrated by patients with headaches presenting to them after being seen in the ER or UCC wanting a refill of their narcotics that they were given Many patients don't follow up with their PCPs and simply keep returning to the ER UCC for their treatment In short all involved in the care for patients with headache are frustrated by the current system The care for these patients is clearly not optimal It doesn't have to be that way There are a wide variety of effective treatment options available but are underutilized in the acute setting With these treatment options patients no longer have to be treated only with parenteral narcotics only to perpetuate the cycle of suboptimal care described above This concise handbook covers all aspects of acute headache care including care of the child and adolescent with acute headaches treatment of pregnant and breastfeeding women with acute headaches and appropriate evaluation of secondary headaches In addition two other novel chapters are included one on caring for older patients with acute headaches

as well as a chapter describing how to ensure a seamless transition of the patient back to a headache interested provider. Representing an important milestone in the care of patients with headache, this is the first concise handbook available to exclusively address the issue of headache treatment in the acute care setting. Including protocols and strategies that can be used right away, *Management of Headaches in Emergency Room and Urgent Care Settings* provides information about lesser known but effective strategies such as greater occipital nerve blocks that can be easily learned and incorporated in the acute care setting. It emphasizes the continuity of care that is so vital to keep headache patients from returning to the ER and UCC for acute treatment.

**Wolff's Headache and Other Head Pain** Stephen D. Silberstein, Richard B. Lipton, David Dodick, 2008. The 8th edition of Wolff's *Headache and Other Head Pain* remains the definitive reference text in the field. Our knowledge and understanding of headache and its management have changed significantly in the twenty first century. A new international headache classification has been adopted, headache pathophysiology and genetics have advanced, and epidemiologic studies have burgeoned. We have greater insights into the diagnosis and treatment of the secondary headaches. New treatments are available for primary headache disorders including migraine cluster and chronic daily headache, and our understanding and knowledge are increasing by means of ongoing trials. The 8th edition encompasses all of this new material with all chapters updated and many new authors added.

**Headache Relief** Courtney Humphries, 2018. *Handbook of Headache* Paolo Martelletti, Timothy J. Steiner, 2011-11-10. Headache disorders are among the most common disorders of the nervous system. They are pandemic and in many cases they are recurrent and can accompany the patient for the whole life. These disorders impose a substantial burden on headache sufferers, on their families, and on society. The individual impact is measured by the frequency and severity of attacks, while the societal burden is measured in terms of loss of activity at work and school as well as of costs for the health system. As a matter of fact, headaches are ranked in the top ten and maybe the top five causes of disability worldwide; they are therefore extraordinarily common. Population based studies have mostly focused on migraine, which even if it is the most frequently studied headache disorder is not the most common. Other types of headache, such as the more prevalent TTH and subtypes of the more disabling chronic daily headache, have so far received less attention and need to be better investigated. This book will provide

a useful tool to a wide medical population who is required specific skills to diagnose and manage these frequent and often disabling disorders Furthermore it could also represents a compendium for medical students who are usually introduced to this topic through multidisciplinary university programmes      *Overcoming Headaches and Migraines* Lisa Morrone,2008 If you re one of the millions who experience chronic or debilitating headaches and are looking for practical help and answers physical therapist Lisa Morrone has them Nearly 20 years of teaching research and hands on treatment have given her a thorough broad based perspective on head pain Back cover      Headache and Head Pain Robert E.
