years ten years in the United States Air Force primarily in jet fighters and then twenty seven years flying commercial jet airliners I was inspired to write this story after reading the autobiography a few years ago of Gen Chuck Yeager he being the world renowned test pilot World War II fighter ace and first man to break the sound barrier in the Bell X 1 My story is the story of an average pilot an average guy who survived several close calls had many interesting experiences along the way and often wondered Am I still here because I was especially good or because I was especially lucky I think the answer is definitely a combination of the two just as Yeager says or implies in his book With him it may have been a larger contribution of skill but as he said The secret of my success is that I always managed to live to fly another day I have to echo that comment While flying around the country with American Airlines during hours of complete boredom as we say we pilots often

traded our war stories of our flying and other experiences I often thought that I had many tales that were similar to some of Yeager s and that I should put my experiences down on paper even if it would only be my family who might read it So this then is my story my life primarily as it revolved around my aviating experiences over some thirty seven years from the viewpoint of a pilot who has no particular claim to fame but who has survived to fly another day One of the best descriptions of a flying career says You start out with a big bag of luck and an empty bag of experience you want to fill the bag of experience before you empty the bag of luck I guess I have done that Beecher Esther E.
